the principle of automaticity Automaticity is a psychological term used to describe the unconscious way in which we make choices for our daily behaviors Activities like setting an alarm clock at night putting on shoes before you leave the house buckling your seat belt when you get in a car and remembering how to drive to the office these activities do not require much thought we just do them If we consciously thought about each decision that we make we would be exhausted at the end of a day Through automaticity we unconsciously automate some of our routine processes While automaticity has been working against you and your weight loss goals for years THE AUTOMATIC DIET will show you how to redirect your knee jerk impulses so they can work in your favor EBOOK: CONCEPTS OF FITNESS & WELLNESS CORBIN,2015-10-28 EBOOK
