Consumer Studies Past Papers Grade 11 2013:

Food and Cooking Skills Education Anita Tull, 2018-01-29 Food and Cooking Skills Education FCSE is a complex mix of policy and practicality educational theory and pedagogy classroom and government policy This book shows how FCSE has been at the centre of a tussle between education and policy for decades It reviews how FCSE has grappled with various significant issues of concern that threaten to marginalise it and pose problems for educational practicalities as expectations are increased but resources are squeezed It assesses the debate about the significance and importance of acquiring practical food and cooking skills in a society where the purchase of ready made food has become commonplace and public knowledge of where our food comes from is noticeably lacking This has contributed to the escalating incidence of diet related diseases and the attendant cost to society and threatened environmental sustainability In turn governments have reacted by proposals to make practical cooking skills a statutory National Curriculum subject as part of the armoury for tackling such costs Based on detailed research conducted across England and Wales as well as comparisons with thirty five other countries or states the author makes recommendations for policy to manage this challenge facing contemporary society

Waste Management and Sustainable Consumption Karin Ekström, 2014-12-17 The accelerated pace of global consumption over the past decades has meant that governments across the world are now faced with significant challenges in dealing with the dramatically increased volume of waste While research on waste management has previously focused on finding technological solutions to the problem this book uniquely examines the social and cultural views of waste shedding new light on the topic by emphasising the consumer perspective throughout Drawing on a wide variety of disciplines including environmental economic social and cultural theories the book presents philosophical reflections practical examples and potential solutions to the problem of increasing waste It analyses and compares case studies from countries such as Sweden Japan the USA India Nigeria and Qatar bringing out valuable insights for the international community and generating a critical discussion on how we can move towards a more sustainable society This book will be of great interest to post graduate students and researchers in environmental policy waste management social marketing and consumer behaviour as well as policymakers and practitioners in consumer issues and business

The Report: Mongolia 2014 Oxford Business Group, 2014-05-23 Since the country's transition from communism two decades ago the Mongolian economy has experienced rapid liberalisation Sectors including ICT and insurance are expanding quickly and while the mining sector has been responsible for making Mongolia a rising star in the global economy there is great potential for further growth in all economic sectors Politically stable and rich with natural resources Mongolia has emerged as a bellwether for investor confidence in recent years The 2013 commercialisation

of the Oyu Tolgoi gold and copper mine is helping to diversify Mongolia's mineral exports away from coal while the government is working to improve the investment environment by adopting the new Investment Law among other measures. Challenges do exist however from the long harsh winters that slow construction to the difficulty of connecting the sparsely populated nation through ICT and transport systems. In response the government has partnered with the private sector on a number of fronts in order to promote economic diversification and competitiveness. Indian Water Rights United States. Congress.
