

Total Contact Cast

You and your Total Contact Cast

A Total Contact Cast (TCC) is a non-removable cast designed to relieve pressure from your foot by distributing it up your leg. It is considered the gold standard treatment for protecting your foot and promoting faster healing.

HOW CAN I GET THE BEST RESULTS FROM MY TCC?

- Rest your leg as much as possible
- Check your cast daily for any damage
- Check the skin on both legs daily for any signs of rubbing
- Never try to remove the cast yourself

- Do NOT put talcum powder or objects down the cast

- Keep the cast dry; use a limb protector in the shower

- Exercise uncasted joints and follow your clinician's advice on safe movements

Contact Casting Diabetic Foot

Ted A. Lennard

Contact Casting Diabetic Foot:

Wound Care Essentials, 2004 This comprehensive yet concise wound care handbook covers all aspects of wound care wound healing wound assessment and treatment options for all types of wounds More than 100 illustrations checklists tables recurring icons and flowcharts provide easy access to essential information and a 16 page full color insert illustrates the healing process and types of wounds

Wound Care Essentials Sharon Baranoski, Elizabeth A. Ayello, 2008 Written by two well known wound care specialists and an interdisciplinary team of experts this handbook is essential for all professionals involved in wound care including nurses physical therapists physicians podiatrists and long term care professionals The book provides practical comprehensive guidelines for assessment and management of both common and atypical wound problems and covers many topics not sufficiently addressed in other texts such as sickle cell wounds amputation gene therapy and the specific wound care needs of special populations Features include more than 100 photographs and illustrations recurring icons such as Evidence Based Practice and Practice Points case studies and review questions

Clinical Care of the

Diabetic Foot David G. Armstrong, Lawrence Lavery, 2005-02-23 Finally there is a far more practical book on foot care for people with diabetes written especially for the non specialist primary care provider Contents include foot exams risk classification infection foot ulcers debridement evaluation and more All chapters are written by diabetic foot care specialists

Comparative Study of Modified Total Contact Cast and Modified Posterior Slab in Managing Planter Diabetic Foot Ulcers Goyal Ghanshyam, 2017 Abstract There are three basic principles in the management of diabetic foot ulcer DFU u2013adequate debridement and infection control adequate vascularity and adequate offloading Off loading of the ulcer area is extremely important for the healing of neuropathic plantar ulcers Total contact cast is the Gold standard among all offloading techniques but there are some practical limitations with the use of this modality Objective This study was conducted to evaluate the efficacy of Modified Posterior slab posterior slab with Micro Cellular Rubber insole with window at ulcer site with window walking TCC in healing of neuropathic planter diabetic foot ulcers in fore foot and mid foot Method Patients having non healing neuropathic planter diabetic foot ulcers in fore foot and mid foot with Wagner s classification Grade I II were included in this study This is an open level observational study on non healing neuropathic planter diabetic foot ulcers Total 60 subjects attending the foot clinic with non healing neuropathic planter diabetic foot ulcers were included in this study and divided into two groups comprising of 30 patients each Ulcers were debrided in both groups followed by off loading The patients in group A male 16 and female 14 having average age 53.5 yrs 28.73 average HbA1C 9.77% 7 to 12.1 BMI 26.6 20.35 average duration of diabetes 12.68 yrs 01.38 months average duration of DFU 13.52 months 01.60 months were put on modified posterior slab The patients in group B male 21 and female 9 having average age 55 yrs 38 to 73 average HbA1C 9.91% 5.8 to 14.2 BMI 26.8 19 to 36 average duration of diabetes 14.4 yrs 02.40 yrs average duration of DFU 17.53 months 01.72 months were put on modified window walking TCC In both groups X ray of foot Ankle Brachial Index ABI were

normal and monofilament and Vibration perception threshold were impaired Result In group A with posterior slab the average healing time was 12 weeks and in group B with window walking TCC it was 11 2 weeks There was no significant difference found in healing time Though TCC is considered gold standard but modified posterior slab is also a good off loading modality in healing of neuropathic planter diabetic foot ulcers in forefoot and mid foot It was observed that modified posterior slab was more convenient economical and most importantly more acceptable mode of offloading in comparison to window walking TCC In modified posterior slab the whole foot could be observed along with the ulcer as compared to window walking TCC where only the ulcer could be observed In both the offloading modalities regular dressing of ulcer could be carried out by family members caregivers Conclusion u2022tThis study comprehensively evaluated the advantages and disadvantages of a modified posterior slab and a window walking TCC in the treatment of diabetic neuropathic foot ulcer in fore foot and mid foot u2022tModified Posterior Slab is as useful and effective as window walking TCC in healing of non healing neuropathic planter ulcers u2022tModified posterior slab is more economical as single posterior slab can be used till complete healing of ulcer

Difficult Diabetes Geoff V. Gill,Gareth Williams,John C. Pickup,2008-04-15 Difficult Diabetes is intended for diabetologists and endocrinologists who want to keep abreast of the developments in this fast changing world It provides a distillation of clinical wisdom that is desperately required in the absence of evidence based guidelines This book seeks to avoid rehashing the accepted content and dogma found in the excellent textbooks of diabetes It provides more of an in depth coverage than is possible in individual review articles Its key objective is to provide guidance to clinicians about the most topical and controversial aspects of their practice Provides guidance to clinicians about the most topical and controversial aspects of their practice Each chapter is written by an expert in the field who can give a balanced overview of the topic All information is as up to date as possible due to fast production of the book

International Diabetes Monitor ,2007

Fibreglass Total Contact Casting, Removable Cast Walkers, and Irremovable Cast Walkers to Treat Diabetic Neuropathic Foot Ulcers ,2017
