Parkay, 1993 The seventh edition of *Curriculum Planning* is a collection of readings that presents the knowledge, skills, and alternative strategies needed by curriculum planners and teachers at all levels of education from early childhood through adulthood. The book offers a variety of learning experiences for students with wide-ranging interests, learning styles, and backgrounds. Made up of ten chapters, the first six emphasize the development of knowledge and skills in the four bases of the curriculum: social forces, human development, learning, and knowledge and cognition. The last four chapters emphasize the application of curriculum planning skills for educational programs for children, early middle and late adolescents, and adult and senior learners. At all levels, current issues, innovations, and trends are examined from both theoretical and practical viewpoints.

Subject Guide to Books in Print, 1997 **Early Childhood Education** Geva M. Blenkin, Albert Victor Kelly, 1996-04-28 This book makes an important contribution to the theory of early childhood education. It is well written, well researched, and successfully links theoretical issues with practical implementation. *International Journal of Early Years Education* Taking account of the changes in early childhood education imposed by the arrival of The National Curriculum, the contributors to this book believe that early childhood education is distinctive and has its own standards of excellence. The book sets out to show how to combine knowledge of child development, curriculum planning, and the role of subject knowledge in order to make adequate educational provision from a developmental point of view.
