IMPACT OF CLIMATE CHANGE ON GLOBAL SUSTAINABILITY INTERDISCIPLINARY PERSPECTIVES AND SOLUTIONS Dr. M. Tamilselvi, Dr. B. Winmayil, Sustainability is no longer about doing less harm It's about doing more good Jochen Zeitz Climate change refers to long term shifts in temperature weather patterns and environmental conditions on Earth While some changes occur naturally human activities such as burning fossil fuels coal oil and gas deforestation and industrial processes have significantly increased greenhouse gas emissions trapping heat in the atmosphere and causing global warming Climate change is not merely an environmental crisis but a profound challenge to global sustainability affecting ecosystems economies and human societies Rising temperatures extreme meteorological phenomena and biodiversity loss threaten the very foundation of life on Earth Combating climate change requires a collective effort from individuals communities businesses and governments One of the most crucial solutions is reducing carbon emissions by shifting to renewable energy sources such as solar and wind power Sustainable agriculture and forestry practices including forest conservation and eco friendly farming also play a vital role in preserving biodiversity and maintaining ecological balance Improving energy efficiency in homes industries and transportation helps lower energy consumption and reduce greenhouse gas emissions On a global scale international policies and agreements such as the Paris Agreement encourage countries to

collaborate in limiting temperature rise and mitigating climate impacts Additionally raising public awareness and promoting individual actions such as reducing waste using public transport and supporting climate friendly policies are essential steps in fostering a more sustainable future When people make conscious choices about what they consume how they travel and the waste they generate it contributes to a larger shift towards sustainability The power of individual action lies in its ability to inspire others and create a ripple effect that leads to widespread change For instance in August 2018 at the age of 15 Thunberg began protesting outside the Swedish parliament demanding it to take action to address climate change by adhering to the Paris Agreement and reducing greenhouse gas emissions for keeping global temperature rise below 1.5°C Initially a solitary act her protest inspired millions of young people across the globe to join the movement creating the Fridays for Future movement Through legislation carbon pricing and the promotion of renewable energy sources governments can drive large scale environmental change The Danish government has been a global leader in promoting sustainability through comprehensive policies and actions
