

behaviour, identification of the causal factors and optimization of the development.

The first systematic study of children was conducted by G. Stanley Hall who is also called as the “father” of developmental psychology (Keil, N.Dat.) Initially, developmental psychology dealt with only infants and children. But it later expanded its horizon to include the other stages of life such as infants, adolescence and old age. Developmental psychology’s initial appearance was seen more in the literary form in the book “As You Like It” which describes seven stages of a man’s life. John Locke, Jean-Jacques Rousseau, and Charles Darwin, who were the three early scholars, proposed three major theories of human behaviour. Locke proposed that the mind of the new born is like a blank slate where information is inserted through experience. Rousseau introduced the three development stages of a human i.e. infant, childhood and adolescence. Darwin suggested that development happened through evolutionary recapitulation.

### **Benefits of Understanding Developmental Psychology**

The scientific study of developmental psychology started in the late 19th century, however it was only in the early 20th century that psychologists developed new ideas and methods of human behaviour and its development during the different life stages. Below are the four benefits of understanding developmental psychology.

First, one of the advantages to study developmental psychology is to understand what is normal and what is not. Many people consider themselves as normal and like to be called as fairly typical of people in general. Developmental psychology provides the information of the typical
