Clifford, Noreen Yazejian, Wonkyung Jang, Dari Jigjidsuren, 2021 Early childhood is a crucial stage in a child s life and aspects of the environment in the physical social emotional cognitive and health and safety domains all play important roles in shaping children s development during these early years Having a valid and reliable measure of the quality of these aspects of children s care settings is critical The Early Childhood Environment Rating Scale ECERS 3 is the leading research based instrument for examining these influential global factors that directly impact children in early childhood environments In this new guide readers will find an in depth description of both the conceptual model underlying the ECERS 3 and innovative ways of analyzing data for a fuller understanding of what can be done with the scale and why it is integral to the evaluation of early care and education The authors analyze a large database of classroom observations to help ECERS 3 users better

understand interpret and utilize their own findings Readers will also see how components of their ECERS 3 data relate to one another within and across subscales and within the scale as a whole A Guide to Analyzing and Interpreting ECERS 3 Data will assist program directors agency administrators preK K teaching coaches mentors school principals researchers and others who use the ECERS 3 to more successfully document interpret and analyze the quality of essential influential factors in an early learning setting This resource will help guide program improvement initiatives with insight into what is needed for children s development and learning Book Features Provides a framework for thinking about how early childhood care and education learning environments fit into the larger picture of influences on children s development Presents a theory of change that combines understanding how children learn and develop with how early education and care affect long term outcomes Analyzes what ECERS 3 data looks like for a large sample of classrooms and by different child and teacher characteristics Teaching Middle Years Donna Pendergast,Katherine Main,Nan Bahr,2024-11-15 Teaching Middle Years has established itself as the leading text to focus on the adolescent years of schooling Recognition of the educational importance of this age group continues to grow as research reveals the benefits of programs designed especially for young people s needs With a renewed approach this fourth edition includes new chapters on Indigenous Knowledges STEAM education and sustainable practices A trusted resource the book continues to provide a systematic overview of the philosophy principles and key issues in middle schooling together with an enhanced focus on the emotional and developmental challenges unique to this age group There is an emphasis on creating positive learning environments engaging relational pedagogies achieving effective transition the importance of physical activity and health in adolescence and developing cooperative and collaborative learning Further there is an enhanced focus on practical applications right throughout the book Featuring contributions from leading experts in the field and fully revised and updated to reflect the latest research Teaching Middle Years will assist both pre service and in service teachers to bring out the very best in their students

Decolonizing Qualitative Approaches for and by the Caribbean Saran Stewart,2020-02-01 As academics in postcolonial Caribbean countries we have been trained to believe that research should be objective a measurable benefit to the public good and quantifiable in nature so as to generalize findings to develop knowledge societies for economic growth What happens however when the very word research connotes a derogatory term or semblance of distrust Smith 1999 speaks towards the distrustful nature of the term as a legacy of European imperialism and colonialism Against this backdrop how do Caribbean researchers leverage recognized and valued indigenous methods of knowing and understanding for and by the Caribbean populace How do we learn from indigenous research methods such as Kaupapa Maori Smith 1999 and develop an understanding of research that is emancipatory in nature Decolonizing qualitative methods are rooted in critical theory and grounded in social justice resistance change and emancipatory research for and by the Other Said 1978 Rodney s 1969 legacy of groundings provides a Caribbean oriented ethnographic approach to collecting data about people and culture It is

an anti imperialist method of data collection focused on the socioeconomic and political environment within the post colonial context Similar to Rodney other critical Caribbean scholars have moved the research discourse to center on the notions of resistance struggle Chevannes 1995 Feraria 2009 and decolonizing methodologies This proposed edited volume will provide a collective body of scholarship for innovative uses of decolonizing qualitative research In order to theorize and conduct decolonizing research one can argue that the researcher as self and as the Other needs to be interrogated Borrowing from an autoethnographic ontology the researcher or investigator recognizes the self as the unit of measure and there is a concerted effort to continuously see the self seeing the self through and as the other Alexander 2005 Ellis 2004 This level of interrogation may require frameworks such as Reasonable Humanism in which there is a clear understanding of the role of the researcher and researched from a physiological and psychosocial standpoint Thereafter the researcher is better prepared to enter into a discourse about decolonizing methodologies The origins of qualitative inquiry in the Caribbean can be traced to political and economic discourses Marxism postcolonialism neocolonialism capitalism liberalism postmodernism which have challenged ways of knowing and the construction of knowledge Evans 2009 traced the origins of qualitative inquiry to slave narratives proprietor s journals missionaries reports and travelogues Common to the Caribbean is an understanding of how colonial legacies of research have ridiculed oral traditions language and ways of knowing often rendering them valueless and inconsequential This proposed edited volume acknowledges the significance of decolonizing approaches to qualitative research in the Caribbean and the wider Caribbean diaspora It includes an audience of scholars teacher researchers and students primarily in and across the humanities social sciences and educational studies This proposed volume would provide much needed knowledge and best practice strategies to the community of researchers engaged in decolonizing methodologies Additionally this volume will allow readers to think of new imaginings of research design that deconstruct power and privilege to benefit knowledge communities and participants It will spark key objectives directions and frameworks for deeper discussions and interrogations of normative westernized and hegemonic approaches to qualitative research Lastly the volume will welcome empirical studies of application of decolonizing methodologies and theoretical studies that frame critical discourse
