General Power Tool Safety Warnings

WARNING: Read all safety warnings and all instructions. Failure to follow the warnings and instructions may result in death or serious injury.

SAVE ALL WARNINGS AND INSTRUCTIONS FOR FUTURE REFERENCE

The term "power tool" in the warnings refers to your mains-operated (corded) power tool or battery-operated (cordless) power tool.

1) WORK AREA SAFETY

- Keep work area clean and well lit. Cluttered or dark areas invite accidents.
- Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust. Power tools create sparks which may ignite the dust or fumes.
- Keep children and bystanders away while operating a power tool. Distractions can cause you to lose control.

2) ELECTRICAL SAFETY

- Power tool plugs must match the outlet. Never modify the plug in any way. Do not use any adapter plugs with earthed (grounded) power tools. Unmodified plugs and matching outlets will reduce risk of electric shock.
- Avoid body contact with earthed or grounded surfaces such as pipes, radiators, ranges and refrigerators. There is an increased risk of electric shock if your body is earthed or grounded.
- Do not expose power tools to rain or wet conditions. Water entering a power tool will increase the risk of electric shock.
- Do not abuse the cord. Never use the cord for carrying, pulling or unplugging the power tool. Keep cord away from heat, oil, sharp edges or moving parts. Damaged or entangled cords increase the risk of electric shock.
- When operating a power tool outdoors, use an extension cord suitable for outdoor use. Use of a suitable cord outdoors will reduce the risk of electric shock.
- If operating a power tool in a damp location is unavoidable, use a ground fault circuit interrupter (GFCI) protected supply. Use of a GFCI reduces the risk of electric shock.

3) PERSONAL SAFETY

- Stay alert, watch what you are doing and use common sense when operating a power tool. Do not use a power tool while you are tired or under the influence of drugs, alcohol or medication. A moment of inattention while operating power tools may result in serious personal injury.
- Use personal protective equipment. Always wear eye protection. Protective equipment such as dust mask, non-skid safety shoes, hand tool, or hearing protection used for appropriate conditions will reduce personal injuries.

- Prevent unintentional starting. Ensure the switch is in the off position before connecting to power source or another battery pack, picking up or carrying the tool. Carry the power tool with your finger on the switch or unplugging power tools that have the switch on the tool.
- Remove any adjusting key or wrench before turning the power tool on. A wrench or key left attached to a rotating part of the power tool may result in personal injury.
- Do not overreach. Keep proper stance and balance at all times. This enables better control of the power tool in unexpected situations.
- Dress properly. Do not wear loose clothing or jewelry. Keep your hair, clothing and gloves away from moving parts. Loose clothes, jewelry or long hair can be caught in a rotating part.
- If devices are provided for the connection of dust extraction and collection facilities, ensure these are connected and properly used. Use of dust collection can reduce dust-related hazards.
- POWER TOOL USE AND CARE**
 - Do not force the power tool. Use the correct power tool for your application. The correct power tool will do the job better and safer at the rate for which it was designed.
 - Do not use the power tool if the switch does not turn it on and off. Any power tool that cannot be controlled with the switch is dangerous and must be repaired.
 - Disconnect the power tool from the power source or the battery pack from the power tool before making any adjustments, changing accessories, or storing power tools. Such preventive safety measures reduce the risk of starting the power tool accidentally.
 - Store idle power tools out of the reach of children and do not allow persons unfamiliar with the power tool or the instructions to operate the power tool. Power tools are dangerous in the hands of untrained users.
 - Maintain power tools. Check for misalignment or binding of moving parts, breakage of parts and other conditions that may affect the power tool's operation. If the tool is damaged, have the power tool repaired before use. Many accidents are caused by poorly maintained power tools.
 - Keep cutting tools sharp and clean. Properly maintained cutting tools with sharp cutting edges are less likely to bind or kick back.
 - Use the power tool, accessories and tool bits, etc. in accordance with these instructions, taking into account the working conditions and the work to be performed. Use of the power tool for operations different from those intended could result in a hazardous situation.
- SERVICE**
 - Have your power tool serviced by a qualified repair person using only identical replacement parts. This will ensure that the safety of the power tool is maintained.

Additional Safety Instructions

- Use auxiliary handles, if supplied with the tool. Loss of control can cause personal injury.
- Hold power tool for insulated gripping surfaces, when performing an operation where the cutting edge may contact a hidden wiring or the steel core. Cutting accessory contacting a "live" wire may cause exposed metal parts of the power tool "live" and could give the operator an electric shock.
- Use clamps or other practical way to secure and support the workpiece to a stable platform. Holding the work by hand or against your body is unstable and may lead to loss of control.
- Accessories must be rated for at least the speed recommended on the tool warning label. Wires and other accessories running over heated surfaces may ignite and cause injury. Accessories must be rated for use on the tool.
- Wear safety goggles or other eye protection. Hammering and drilling operations cause chips to fly. Flying particles can cause permanent eye damage.
- Keep hands dry, clean, free from oil and grease. It is recommended to use rubber gloves. The use of gloves will reduce the risk of slipping.
- Do not overreach while operating the tool. Maintain a balanced working stance at all times. When necessary, use only properly positioned, safe, platforms and scaffolding. **WORK SAFE!**
- Do not operate this tool for long periods of time. Vibration caused by the operating action of this tool may cause numbness, tingling, and pain. Use gloves to provide extra cushion, take frequent rest periods, and limit daily time of use.
- Air vents often cover moving parts and should be avoided. Loose clothes, jewelry or long hair can be caught in moving parts.
- An extension cord must have adequate wire size (AWG or American Wire Gauge) for safety. The undersize of the cord will reduce the capacity of the cable. Cord that is 16 gauge has more capacity than 18 gauge. An undersized cord will cause a drop in line voltage resulting in loss of power and overheating. When using more than one extension to make up the total length, make sure each individual extension contains the minimum wire size. The following table shows the correct size to use depending on cord length and horsepower ampere rating. If in doubt, use the next heavier gauge. The smaller the gauge number, the heavier the cord.

Ampere Rating	Minimum Gauge for Cord Size				
	120 V	120 V	240 V	240 V	240 V
Wire Gauge	120 V	120 V	240 V	240 V	240 V
15	16	16	16	16	16
20	14	14	14	14	14
25	12	12	12	12	12
30	10	10	10	10	10
35	8	8	8	8	8
40	6	6	6	6	6

A WARNING: ALWAYS use safety glasses. Everyday eyeglasses are NOT safety glasses. Also use face or eye protection when operating power tools. **WEAR CERTIFIED SAFETY EQUIPMENT.**

- ANSI Z87.1 eye protection (CAN/CSA Z94.3).
- ANSI S12.6 (23.1) hearing protection.
- NIOSH/CDPH/MSHA respiratory protection.

A WARNING: Some dust created by power sanding, sawing, grinding, drilling and other construction activities contains chemicals known to cause cancer, birth defects or other reproductive harm. Some examples of these chemicals are:

- lead from lead-based paints,
- crystalline silica from bricks and cement and other masonry products, and
- nickel and iron from ferrous metallic materials.

Your risk from these exposures varies, depending on how often you do this type of work. To reduce your exposure to these chemicals, work in a well ventilated area, and work with approved safety equipment, such as those dust masks that are specially designed to filter out microscopic particles.

- Always use proper sanding, grinding, cutting, drilling, and other construction activities. Wear protective clothing and wash exposed areas with soap and water, allowing dust to get into your mouth, eyes, or hair on the skin may promote absorption of some chemicals.

A WARNING: Use of this tool can generate and/or disperse dust, which may cause serious and permanent respiratory or other injury. Always use NIOSH/CDPH approved respiratory protection appropriate for the dust exposure. Direct particles away from face and body.

A WARNING: Always wear proper personal hearing protection that conforms to ANSI S12.6 (23.1) during use. Under some conditions and duration of use, noise from this product may contribute to hearing loss.

The label on your tool may include the following symbols. The symbols and their definitions are as follows:

V	volt	A	ampere
Hz	hertz	W	watt
min	minutes	~ or AC	alternating current
ms or DC	direct current	~ or AC/DC	alternating or direct current
