**The Vacuum Cleaner** Carroll Gantz, 2012-09-26 House cleaning has been an innate human activity forever but only since the early 19th century have mechanical devices replaced the physical labor performed mostly by women Mechanical carpet sweepers were replaced by manual suction cleaners which in turn were replaced by electric vacuum cleaners in the early 20th century Innovative inventors who improved vacuum cleaners as electricity became commonly available made these advances possible Many early manufacturers failed but some such as Bissell Hoover Eureka and others became household names as they competed for global dominance with improved features performance and appearance This book describes the fascinating people who made this possible as well as the economic cultural and technological contexts of their times From obscure beginnings 200 years ago vacuum cleaners have become an integral part of modern household culture *From Craft to Profession* Mary N. Woods, 2023-04-28 This is the first in depth study of how the architectural profession emerged in early American history Mary Woods dispels the prevailing notion that the profession developed under the leadership of men formally schooled in architecture as an art during the late nineteenth century Instead she cites several instances in the early 1800s of craftsmen builders who shifted their identity to that of professional architects While struggling to survive as designers and supervisors of construction projects these men organized professional societies and worked for architectural education appropriate compensation and accreditation In such leading architectural practitioners as B Henry Latrobe Alexander J Davis H H Richardson Louis Sullivan and Stanford White Woods sees collaborators partners merchandisers educators and lobbyists rather than inspired creators She documents their contributions as well as those far less familiar of women architects and people of color in the profession s early days Woods s extensive research yields a remarkable range of archival materials correspondence among carpenters 200 year old lawsuits architect client spats the organization of craft guilds apprenticeships university programs and correspondence schools and the structure of architectural practices labor unions and the building industry In presenting a more accurate composite of the architectural profession s history Woods

lays a foundation for reclaiming the profession's past and recasting its future. Her study will appeal not only to architects but also to historians, sociologists, and readers with an interest in architecture's place in America today. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1999. This is the first in-depth study of how the architectural profession emerged in early American history. Mary Woods dispels the prevailing notion that the profession developed under the leadership of men formally schooled in architecture as an art during the 19th century.
