Toyota's Recalls and the Government's Response United States. Congress. Senate. Committee on Commerce, Science, and Transportation, 2011      **The Human Brand** Chris Malone, Susan T. Fiske, 2013-10-07 Why we choose companies and brands in the same way that we unconsciously perceive judge and behave toward one another People everywhere describe their relationships with brands in a deeply personal way we hate our banks love our smartphones and think the cable company is out to get us What's actually going on in our brains when we make these judgments Through original research customer loyalty expert Chris Malone and top social psychologist Susan Fiske discovered that our perceptions arise from spontaneous judgments on warmth and competence the same two factors that also determine our impressions of people We see companies and brands the same way we automatically perceive judge and behave toward one another As a result to achieve sustained success companies must forge genuine relationships with customers And as customers we have a right to expect relational accountability from the companies and brands we support Applies the social psychology concepts of warmth what intentions others have toward us and competence how capable they are of carrying out those intentions to the way we perceive and relate to companies and brands Features in depth analyses of companies such as Hershey's Domino's Lululemon Zappos Amazon Chobani Sprint and more Draws from original research evaluating over 45 companies over the course of 10 separate studies The Human Brand is essential reading for understanding how and why we make the choices we do as well as what it takes for companies and brands to earn and keep our loyalty in the digital age      *Drucker's Lost Art of Management: Peter Drucker's Timeless Vision for Building Effective Organizations* Joseph A. Maciariello, Karen Linkletter, 2011-04-08 For Drucker management was a moral force not merely a tool at the service of the amoral market Maciariello and Linkletter provide a very thoughtful and challenging journey in understanding Drucker's profound insights into the meaning of management as a liberal art C William Pollard Chairman Emeritus The ServiceMaster Company Linkletter and Maciariello have done a masterful job in bringing into focus the connections between Drucker's visions of management as a liberal art of leadership dominated by integrity high moral values a focus on developing people an emphasis on performance and results and on balancing stability and continuity vs the discontinuities created by change Kenneth G Wilson Nobel Laureate in Physics 1982 20 year disciple of Drucker's writings Maciariello and Linkletter provide a must read for a new class of managers and academics who see beyond the bottom line David W Miller Ph D Director Princeton Faith Work Initiative and Associate Research Scholar Princeton University and President The Avodah Institute About the Book While corporate malfeasance was once considered the exception the American public is increasingly viewing unethical immoral and even criminal business behavior as the norm According to the authors of Drucker's Lost Art of Management there is some truth behind this new perception Business management has lost its bearings and the authors look to Peter Drucker's vision of management as a liberal art to steer business back on course Recognized as the world's leading

Drucker scholar Joseph Maciariello along with fellow Drucker scholar Karen Linkletter provides a blueprint for making corporate American management more functional and redeeming its reputation Throughout his career Peter Drucker made clear connections between the liberal arts and effective management but he passed away before providing a detailed exposition of his ideas Maciariello and Linkletter integrate their Drucker expertise in management and the liberal arts to finally define management as a liberal art and fulfill Drucker's vision In Drucker's Lost Art of Management Maciariello and Linkletter examine Drucker's contention that managers must concern themselves with the foundational concepts of political science history economic theory and other liberal arts such as Societal values and standards The use and abuse of power Individual character development Innovation and technology The nature of good and evil The role managers play in a healthy society The authors create a new philosophy of management based on the principles leaders throughout history have relied on to be effective both individually and as custodians of civilized society and healthy economies Our future executives professionals managers and entrepreneurs are on track to learning and perpetuating the idea that only the bottom line matters in business a concept that benefits no one in the end It's up to us to instill the ageless verities that make for good management good society and good business results A passionate call for radical change in today's management practices Drucker's Lost Art of Management provides the ideas concepts and practical advice to make that change happen before it's too late
