Conservancy The Land Trust Movement In America Richard Brewer:

Conservancy Richard Brewer, 2003 The first complete treatment of the U S land trust movement as a crucial feature of current efforts to protect the environment **The State of Nonprofit America** Lester M Salamon, 2012-05-14 Today America's nonprofit organizations seem caught in a force field buffeted by four impulses voluntarism professionalism civic activism and commercialism Too little attention however has been paid to the significant tensions among these impulses Understanding this force field and the factors shaping its dynamics thus becomes central to understanding the future of particular organizations and of the nonprofit sector as a whole In this second edition of an immensely successful volume Lester Salamon and his colleagues offer an overview of the current state of America's nonprofit sector examining the forces that are shaping its future and identifying the changes that might be needed The State of Nonprofit America has been completely revised and updated to reflect changing political realities and the punishing economic climate currently battering the nonprofit sector which faces significant financial challenges during a time when its services are needed more than ever The result is a comprehensive analysis of a set of institutions that Alexis de Tocqueville recognized to be more deserving of our attention than any other part of the American experiment **Getting to Green** Frederic C. Rich, 2016-04-14 Regardless of your place on the political spectrum there is much to admire in this book which reminds us that the stewardship of nature is an obligation shared by all Americans U S Senator Angus S King Jr The Green movement in America has lost its way Pew polling reveals that the environment is one of the two things about which Republicans and Democrats disagree most Congress has not passed a landmark piece of environmental legislation for a quarter century As atmospheric CO2 continues its relentless climb even environmental insiders have pronounced the death of environmentalism In Getting to Green Frederic C Rich argues that meaningful progress on urgent environmental issues can be made only on a bipartisan basis Rich reminds us of American conservation's conservative roots and of the bipartisan political consensus that had Republican congressmen voting for and Richard Nixon signing the most important environmental legislation of the 1970s He argues that faithfulness to conservative principles requires the GOP to support environmental protection while at the same time he criticizes the Green movement for having drifted too far to the left and too often appearing hostile to business and economic growth With a clear-eyed understanding of past failures and a realistic view of the future Getting to Green argues that progress on environmental issues is within reach The key is encouraging Greens and conservatives to work together in the space where their values overlap what the book calls Center Green Center Green takes as its model the hugely successful national land trust movement which has retained vigorous bipartisan support Rich's program is pragmatic and non ideological It is rooted in the way America is not in a utopian vision of what it could become It measures policy not by whether it is the optimum solution but by the two-part test of whether it would make a meaningful contribution to an environmental problem and whether it is achievable politically Application of the Center Green approach moves us away from

some of the harmful orthodoxies of mainstream environmentalism and results in practical and actionable positions on climate change energy policy and other crucial issues This is how we get to Green

Conservancy Richard Brewer, 2003 Discusses four major national land trusts The Nature Conservancy Trust for Public Land American Farmland Trust and Rails to Trails Conservancy and gives a generous sampling of information about the activities and accomplishments of smaller local trusts nationwide

Democratic by Design Gabriel Metcalf, 2015-11-17 Americans have since our founding participated in a variety of alternative institutions self organized projects that work outside the traditional structures of government and business to change society From the town meetings that still serve as our ideal of self governance to the sustainable food movement that is changing the way we think about farming the land and feeding our families these secondary structures have given rise to many of our most exciting and important innovations Yet most people still know little about them even as their numbers and their influence increase In today's climate of widespread economic inequity political gridlock and daunting environmental challenges we sorely need a fresh approach to social and political change In Democratic by Design Gabriel Metcalf sketches out a strategy that starts with small scale living examples of a better society that can ultimately scale up to widespread social transformation Using examples like car sharing organizations community land trusts credit unions workers co ops citizen juries community supported agriculture farms mission driven corporations and others Democratic by Design shows how alternative institutions can be the crucial spark for a broad new progressive movement

Nature's Burdens Daniel Nelson, 2017-05-15 Nature's Burdens is a political and intellectual history of American natural resource conservation from the 1980s into the twenty first century a period of intense political turmoil shifting priorities among federal policymakers and changing ideas about the goals of conservation Telling a story of persistent activism conflict and frustration but also of striking achievement it is an account of how new ideas and policies regarding human relationships to plants animals and their surroundings have become vital features of modern environmentalism In the 1960s and 1970s Congress embraced the largely dormant movement to preserve distinctive landscapes and the growing demand for outdoor recreation establishing an unprecedented number of parks monuments and recreation areas The election of Ronald Reagan and a shift to a Republican controlled Senate brought this activity to an abrupt halt and introduced a period of intense partisanship and legislative gridlock that extends to the present In this political climate three developments largely defined the role of conservation in contemporary society environmental organizations have struggled to defend the legal status quo private land conservation has become increasingly important and the emergence of potent scientific voices has promoted the protection of animals and plants and injected a new sense of urgency into the larger cause These developments mark this period as a distinctive and important chapter in the history of American conservation Scrupulously researched scientifically and politically well informed concise and accessibly written Nature's Burdens is the most comprehensive examination of recent efforts to protect and enhance the natural world It will be of interest to environmental historians environmental activists and

any general reader interested in conservation **Free the Land** Audrea Lim, 2024-06-25 An eye opening examination of how treating land as a source of profit has a massive impact on racial inequality and the housing gentrification and environmental crises Climate change gentrification racial inequity and corporate greed are some of the most urgent problems facing our society They are traditionally treated as unrelated issues but they all share a common root the commodification of land Environmental journalist Audrea Lim began to notice these connections a decade ago when she reported on the Native communities leading the fight against oil mining on their lands in the Canadian tar sands near her hometown of Calgary but before long she saw the essential role of land commodification and private ownership everywhere she looked in foreclosure racked suburbs and gentrifying cities like New York City among poor small farmers struggling to keep their businesses afloat and in low income communities attempting to resist mines and industrial development on their lands only to find that their voices counted less than those of shareholders living thousands of miles away *Free The Land* is a captivating and beautifully rendered look at the ways that our relationship to the land is the core cause of the most pressing justice issues in North America Lim expertly weaves together seemingly disparate themes into a unified theory of social justice describes how the land ownership system developed over the centuries and presents original reporting from a wide range of activists and policy makers to illustrate the profound impact it continues to have on our society today Ultimately this book offers a message of hope by approaching these socioeconomic issues holistically we can begin to imagine just alternatives to fossil fueled capitalism new ways to build community and a more sustainable equitable world **Everyday Aesthetics** Yuriko Saito, 2007 Yuriko Saito discusses aspects of our everyday experience that have been neglected by modern Western aesthetic theories *American Studies* ,2006 *Natural Areas Journal* ,1982 **Exacted Conservation Easements** Jessica Owley Lippmann, 2005 *Library Journal* Melvil Dewey, Richard Rogers Bowker, L. Pylodet, Charles Ammi Cutter, Bertine Emma Weston, Karl Brown, Helen E. Wessells, 2005 Includes beginning Sept 15 1954 and on the 15th of each month Sept May a special section School library journal ISSN 0000 0035 called Junior libraries 1954 May 1961 Also issued separately *American Book Publishing Record* ,2004 *Reinventing Conservation Easements* Jeff Pidot, 2005 No recent happening in land conservation rivals the rapid expansion of conservation easements and the related growth in the number of land trusts over the past 15 years Among the forces driving this phenomenon are tax and other public subsidies and the view that the conservation easement is a win win strategy in land protection The thesis of this policy focus report is that conservation easements are a valuable land protection tool complementing regulation land acquisition and tax policies but that reforms are needed in tax and other laws and conventions governing easements lest we risk losing the public benefits for which the easements were established *Big Business and the Roberts Court* ,2009 **Exchange** ,2004 *A Field Guide to Conservation Finance* Story Clark, 2007-04-13 Dealing with land conservation financing this text provides advice on how to tackle the main obstacle to protecting private land in America lack of money It outlines essential tools for raising money

borrowing money and reducing the cost of transactions
