Registration Exam Questions II Nadia Bukhari, 2011. *MCQs in Pharmaceutical Calculations* Ryan F. Donnelly, Johanne Barry, 2009. *MCQs in Pharmaceutical Calculations* aims to help pre registration trainees and pharmacy students with their study enabling them to perform calculations accurately and with confidence. Pharmacists frequently perform simple calculations as part of their professional practice. It is therefore vital that they are able to employ basic numeracy skills accurately so as not to compromise patient safety. The pharmaceutical societies of Great Britain and Northern Ireland RPSGB and PSNI have introduced compulsory calculations elements into the registration examinations. These sections must be passed independently of the rest of the examination. Many Schools of Pharmacy worldwide have also recently increased their emphasis on numeracy skills. It includes 360 calculations questions in three commonly used multiple choice formats: questions based on important areas in pharmaceutical science and practice, manipulation of formulae and dilutions, dosing, pharmacokinetics, formulation and dispensing, pharmaceutical chemistry, descriptive answers giving the reasoning behind the answers. Note: This book is accompanied by an additional 100 calculation based multiple choice questions arranged into five 1 hour tests which will be available from the Pharmaceutical Press FASTtrack website. Importantly these questions are available in the format of both The Royal Pharmaceutical Society and the Pharmaceutical Society of Northern Ireland registration examinations. The fourth title in the Tomorrow's Pharmacist series *MCQs in Pharmaceutical Calculations* will be indispensable to pre registration trainees and pharmacy students to help them prepare for their future career. Also available in this series: Hospital Pre registration Pharmacist Training, Pre registration
