Dhet Financial Accounting Question Papers:

Change Management in TVET Colleges Kraak, Andre, Paterson, Andrew, 2016-07-25 The Technical and Vocational Education and Training TVET college environment is marked by increasingly stark juxtapositions between what needs to be achieved in the post school education sector and the increasing difficulty of current conditions The triple challenge of poverty inequality and unemployment weighs heavily on the social political and economic fabric of the country and expectations are high that the TVET colleges can make a pivotal contribution to counter these challenges Despite laudable increases in TVET enrolment the education system needs to work harder to accommodate the weight of demand for post school further education and training FET band qualifications from young people not in education employment or training At the same time it is vital to secure adequate quality in TVET programmes which depend so much on the competence and commitment of college lecturers This collection offers a set of research papers that provide new analytic and empirical material on The political economy of TVET types in different countries which by comparison illuminate the South African case A periodisation of government interventions in the TVET sector over the last three decades The unsettled state and status of TVET lecturers in relation to their job requirements and conditions of service The halting evolution of collegial relationships between college lecturers towards higher collegiality Employer expectations of college graduates and how colleges are responding and An analysis of the outcomes of a college improvement intervention in Limpopo and the Eastern Cape This book will offer valuable information and insights for decision makers as well as analysts of institutional change concerning links between education and economic growth with particular regard to TVET graduates employment rates

Anchored in Place Leslie Bank, Nico Cloete, 2018-11-05 Tensions in South African universities have traditionally centred around equity particularly access and affordability historical legacies such as apartheid and colonialism and the shape and structure of the higher education system What has not received sufficient attention is the contribution of the university to place based development This volume is the first in South Africa to engage seriously with the place based developmental role of universities In the international literature and policy there has been an increasing integration of the university with place based development especially in cities This volume weighs in on the debate by drawing attention to the place based roles and agency of South African universities in their local towns and cities It acknowledges that universities were given specific development roles in regions homelands and towns under apartheid and comments on why sub national place based development has not been a key theme in post apartheid higher education planning Given the developmental crisis in the country universities could be expected to play a more constructive and meaningful role in the development of their own precincts cities and regions But what should that role be Is there evidence that this is already occurring in South Africa despite the lack of a national policy framework What plans and programmes are in place and what is needed to expand the development agency of universities at the local level Who and what might be involved Where should the focus lie and who might benefit most and why Is there a

need perhaps to approach the challenges of college towns secondary cities and metropolitan centers differently This book poses some of these questions as it considers the experiences of a number of South African universities including Wits Pretoria Nelson Mandela University and especially Fort Hare as one of its post centenary challenges **Accountability in education: meeting our commitments** UNESCO,2017-10-30 The second edition of the Global Education Monitoring Report GEM Report presents the latest evidence on global progress towards the education targets of the UN Sustainable Development Goals With hundreds of millions of people still not going to school and many not achieving minimum skills at school it is clear education systems are off track to achieve global goals The marginalized currently bear the most consequences but also stand to benefit the most if policy makers pay sufficient attention to their needs Faced with these challenges along with tight budgets and increased emphasis on results oriented value for money countries are searching for solutions Increased accountability often tops the list The 2017 8 GEM Report shows the entire array of approaches to accountability in education It ranges from countries unused to the concept where violations of the right to education go unchallenged to countries where accountability has become an end in itself instead of a means to inclusive equitable and high quality education and lifelong learning for all The report emphasizes that education is a shared responsibility While governments have primary responsibility all actors schools teachers parents students international organizations private sector providers civil society and the media 0 3 have a role in improving education systems The report emphasized the importance of transparency and availability of information but urges caution in how data are used It makes the case for avoiding accountability systems with a disproportionate focus on narrowly defined results and punitive sanctions In an era of multiple accountability tools the report provides clear evidence on those that are working and those that are not Back cover
