Cold Spring Harbor Symposia on Quantitative Biology; ,1985 *The Weak Hydrogen Bond* Gautam R. Desiraju, Thomas Steiner, 2001 The weak or non conventional hydrogen bond has been subject of intense scrutiny over recent years in several fields in particular in structural chemistry structural biology and also in the pharmaceutical sciences There is today a large body of experimental and theoretical evidence confirming that hydrogen bonds like C H O N H pi C H pi and even bonds like O H metal play distinctive roles in molecular recognition guiding molecular association and in determining molecular and supramolecular architectures The relevant compound classes include organometallic complexes organic and bio organic systems and also DNA and proteins The book provides a comprehensive assessment of this interaction type and is of interest to all those interested in structural and supramolecular science including fields as crystal engineering and drug design

Molecular Biology of the Cell ,2006 Entomopathogenic Nematodes as Biological Control Agents David I. Shapiro-Ilan, Edwin E. Lewis, 2024-09-23 Entomopathogenic nematodes EPNs are biocontrol agents that are used to control a wide variety of insect pests within agriculture and forestry In addition to their use as bio pesticides EPNs have a fascinating biology and are thus considered model organisms in ecology symbiosis and pathogenesis This book presents basic knowledge and diverse applications to illustrate how EPNs play an important role as potent biocontrol solutions This book is a must have for all pest management professionals including those practicing integrated pest management strategies
