The key can be inserted or removed in this position only.

After removing the key, turn the steering wheel slightly to the left or right until you hear the lock engage.

Interlock with automatic transmission

The key can only be turned back to position 0 or removed if the selector lever is in position P; interlock.

Steering unlocked

A slight steering wheel movement often makes it easier to turn the key from 0 to 1.

Some power accessories are ready for operation.

Ignition switched on

All vehicle systems are ready for operation.

Starting engine

Do not run the engine in enclosed spaces; otherwise, inhalation of toxic exhaust gases can cause unconsciousness and death. The exhaust gases contain carbon monoxide, an odorless and colorless, but highly toxic gas. Do not leave the vehicle unattended with the engine running, since an unattended vehicle with a running engine is a safety hazard. To prevent the vehicle from rolling, always shift into neutral or selector lever position P and engage the handbrake firmly before leaving the vehicle with the engine running. ⁴

Do not discontinue the starting procedure prematurely, but also do not prolong it for more than 20 seconds. Release the ignition key immediately as soon as the engine starts.

When starting the engine, do not press the accelerator pedal.

Do not allow the engine to warm up while parked; instead, start driving immediately at a moderate engine speed.

Indicator lamps

The warning lamp lights up. Exhaust values are deteriorating. Have the vehicle checked as soon as possible.

Under certain conditions, the indicator will flash. This indicates a serious rate of engine misfire. When this occurs, you should reduce speed and consult the nearest BMW Sports Activity Vehicle Center as soon as possible. Severe engine misfire, even for only a short period of time, can seriously damage emission control components, especially the catalytic converter.

Display of the previously described malfunction on Canadian models.

The warning lamp lights up. Malfunction in the engine electronics. You can continue to drive with reduced engine
