E Scooter Assembly:

Advances in Design Engineering Francisco Cavas-Martínez, Félix Sanz-Adan, Paz Morer Camo, Ruben Lostado Lorza, Jacinto Santamaría Peña, 2020-03-09 This book gathers the papers presented at the XXIX International Congress INGEGRAF The digital transformation in graphic engineering which was held in Logroño Spain on June 20 21 2019 It reports on cutting edge topics in product design and manufacturing such as industrial methods for integrated product and process design innovative design and computer aided design Further topics covered include virtual simulation and reverse engineering additive manufacturing product manufacturing engineering methods in medicine and education representation techniques and design and modeling for nautical engineering and construction aeronautics and aerospace contexts The book is divided into six main sections reflecting the focus and primary themes of the conference The contributions presented here will not only provide researchers engineers and experts in a range of industrial engineering subfields with extensive information to support them in their daily work but will also stimulate new research directions advanced applications of the methods discussed and future interdisciplinary collaborations

Electric Bikes in the People's Republic of China Asian Development Bank, 2009-06-01 Electric bikes e bikes provide low cost convenient and relatively energy efficient transportation to an estimated 40 million 50 million people in the People's Republic of China PRC quickly becoming one of the dominant travel modes in the country As e bike use grows concerns are rising about lead pollution from their batteries and emissions from their use of grid electricity primarily generated by coal power plants This report analyzes the environmental performance of e bikes relative to other competing modes their market potential and the viability of alternative battery technologies It also frames the role of e bikes in the PRC's transportation system and recommends policy for decision makers in the PRC's central and municipal governments

Quality Life Cycle Assessment in Sustainable Product Development Bożena Gajdzik, Radosław Wolniak, Dominika Siwiec, Remigiusz Gawlik, Andrzej Pacana, 2025-10-29 This groundbreaking book introduces the Quality Life Cycle Assessment QLCA model a novel approach that integrates product quality assessment and life cycle assessment LCA in sustainable manufacturing By incorporating environmental criteria alongside quality considerations during the virtual prototyping phase the QLCA model revolutionizes decision making for sustainable product development This book bridges the gap between product improvement and LCA application addressing the critical need for sustainability in modern manufacturing Leveraging digital technologies such as Big Data Data Analytics and Digital Twin this book demonstrates how to construct virtual product models with comprehensive LCA integration The QLCA model particularly suited for smart factories supports innovation and informed decision making in sustainable product development Aimed at students research and development managers and engineers this volume offers practical guidance on balancing customer satisfaction with environmental impact throughout a product's life cycle By elucidating the application of LCA in product life cycle assessment and its combination with quality considerations during prototyping this book provides

invaluable insights for practitioners navigating the complexities of sustainable manufacturing in the digital age

Future Automotive Production Conference 2022 Klaus Dröder, Thomas Vietor, 2023-03-18 This book comprises the proceedings of the conference Future Automotive Production 2022 which took place in Wolfsburg The conference focused on hybrid lightweight design which is characterized by the combination of different materials with the aim of improving properties and reducing weight In particular production technologies for hybrid lightweight design were discussed new evaluation methods for the ecological assessment of hybrid components were presented and future oriented approaches motivated by nature for the development of components assemblies and systems were introduced Lightweight design is a key technology for the development of sustainable and resource efficient mobility concepts Vehicle manufacturers operate in an area of conflict between customer requirements competition and legislation Material hybrid structures which combine the advantages of different materials have a high potential for reducing weight while simultaneously expanding component functionality The future efficient use of function integrated hybrid structures in vehicle design requires innovations and constant developments in vehicle and production technology There is a great demand especially with regard to new methods and technologies for affordable lightweight construction in large scale production taking into account the increasing requirements with regard to variant diversity safety and quality

Transdisciplinary Engineering for Complex Socio-technical Systems Kazuo Hiekata, Bryan R. Moser, Masato Inoue, Nel Wognum, 2019-11-15 Industry and society are complex socio technical systems and both face problems that can only be solved by collaboration between different disciplines Collaboration between academia and practice is also needed to develop viable solutions Many engineering problems also require such an approach which is known as Transdisciplinary Engineering TE This book presents the proceedings of the 26th ISTE International Conference on Transdisciplinary Engineering held in Tokyo Japan from 30 July 1 August 2019 The title of the conference was Transdisciplinary Engineering for Complex Socio technical Systems and of the 86 submitted papers 68 peer reviewed papers by authors from 17 countries were delivered at the conference These papers range from theoretical and conceptual to strongly pragmatic They address industrial best practice and are grouped here under 10 themes advanced robotics for smart manufacturing design of personalized products and services engineering methods for industry 4 0 additive and subtractive manufacturing decision supporting tools and methods complex systems engineering big data analytics in manufacturing and services concurrent engineering cost modeling and digital manufacturing modeling and simulation Presenting the latest research results and knowledge of product creation processes and related methodologies the book will be of interest to researchers design practitioners and educators alike
