

Delta Science Reader *Earth, Moon, and Sun* Teacher's Guide

In the Delta Science Reader *Earth, Moon, and Sun*, students read about Earth's place in space, the forces that affect our planet, and the Earth movements that bring about day and night, seasons, and years. They discover how the Sun is similar to and different from other stars and find out about its composition and the source of its heat and light energy. They learn about Earth's nearest neighbor in space, the Moon, and how its motion relative to Earth produces Moon phases, tides, and eclipses. A biographical sketch introduces students to Copernicus and the heliocentric theory. Finally, a field guide to the planets summarizes important data and interesting facts about the planets in our solar system.

DELTA SCIENCE READERS for grades 6–8 are content-rich, 24-page informational texts that present key science concepts and vocabulary. They cover important science topics in an accessible, engaging format.

TEACHER'S GUIDES for Delta Science Readers for grades 6–8 contain general background information for linking science and literacy, assessment, and including all learners, as well as a comprehensive teaching plan. The teaching plan features three-step lessons and spotlight panels on science, literacy, and meeting individual needs.
