Reading with Purpose

Read the review questions at the end of the chapter *before* you read the chapter. Keep the questions in mind as you read to help you determine which information is most important.

Every kind of job requires special equipment. Some tools are necessary to do the job—others just make it easier. The list of basic supplies is not long. Other tools can be added as you need them. See Figure 24-1 for a list of the basic sewing supplies plus additional supplies you might want to add later on.

Cutting Tools

Many types of shears and scissors are available for sewing, 24-2. The list of basic supplies includes a pair of shears. Other cutting tools are helpful additions.

Shears and scissors are not the same. **Shears** are longer than scissors and usually have blades that are 7 to 8 inches long. The handles are not the same size—shears are shaped to fit your hand. Left-handed persons should use left-handed shears.

Use shears to cut pattern pieces from the fabric. Bent-handled shears are the most popular cutting tool for fabric. The bent handle allows the fabric to lie flat as it is cut. This results in more accurate cutting.

Scissors are usually short, and the handles have small, matching holes. Blades are different widths, but about 4 to 6 inches long. Use scissors to clip around curves, trim seams, and clip threads. Scissors are lightweight and easy to handle.
