Author cocitation analysis ACA is a subfield of informetrics which is a broader term referring to the quantitative study of retrieval and processing bibliometric data collected from all types of communication media including journals books and conference proceedings While ACA is one of the few research methodologies that transcend the individual field of inquiry and despite its usefulness and capabilities to reveal a larger vista hidden in bibliographic databases it is not a particularly popular research tool in some academic disciplines This book covers all essential ACA topics for graduate students and researchers who want to learn the basics and the research techniques to delineate the intellectual structure of various academic disciplines compare cumulative research traditions demonstrate theoretical differences between competing approaches and to trace a paradigm shift in various academic disciplines over time

Data Mining Using SAS Enterprise Miner Randall Matignon, 2007-08-13 The most thorough and up to date introduction to data mining techniques using SAS Enterprise Miner The Sample Explore Modify Model and Assess SEMMA methodology of SAS Enterprise Miner is an extremely valuable analytical tool for making critical business and marketing decisions Until now there has been no single authoritative book that explores every node relationship and pattern that is a part of the Enterprise Miner software with regard to SEMMA design and data mining analysis Data Mining Using SAS

Enterprise Miner introduces readers to a wide variety of data mining techniques and explains the purpose of and reasoning behind every node that is a part of the Enterprise Miner software. Each chapter begins with a short introduction to the assortment of statistics that is generated from the various nodes in SAS Enterprise Miner v4.3 followed by detailed explanations of configuration settings that are located within each node. Features of the book include: The exploration of node relationships and patterns using data from an assortment of computations, charts and graphs commonly used in SAS procedures. A step by step approach to each node discussion along with an assortment of illustrations that acquaint the reader with the SAS Enterprise Miner working environment. Descriptive detail of the powerful Score node and associated SAS code which showcases the importance of managing, editing, executing and creating custom designed Score code for the benefit of fair and comprehensive business decision making. Complete coverage of the wide variety of statistical techniques that can be performed using the SEMMA nodes. An accompanying Web site that provides downloadable Score code, training code and data sets for further implementation, manipulation and interpretation as well as SAS IML software programming code. This book is a well crafted study guide on the various methods employed to randomly sample, partition, graph, transform, filter, impute, replace, cluster and process data as well as interactively group and iteratively process data while performing a wide variety of modeling techniques within the process flow of the SAS Enterprise Miner software. Data Mining Using SAS Enterprise Miner is suitable as a supplemental text for advanced undergraduate and graduate students of statistics and computer science and is also an invaluable all encompassing guide to data mining for novice statisticians and experts alike.

The Humanities Computing Yearbook 1989-1990 Ian Lancashire, 1991. This is the second in a series of comprehensive annual reference guides to the use of computers in all the disciplines of the humanities. Like its predecessor, this volume provides a taxonomy of the field and an annotated survey of publications, research centers, text archives and termbanks, electronic communications software and hardware relevant to the humanities. It also includes special larger entries for important software that offer up to date information and practical help in applying that information to research projects and instruction in colleges and universities. For the 1989-1990 edition, Lancashire has for the first time appointed an international advisory board of specialists to assist in discovering, assembling and evaluating materials for inclusion and to keep up with the rapidly developing nature of the field and its international constituency. Lancashire has included many completely new or revised sections including a major new chapter on computing in Law. A monumental work of current and enduring value. The Humanities Computing Yearbook will prove invaluable to a wide range of students, teachers and researchers in humanities and social sciences, computational linguistics and related fields in computer science.

The Impact of Computer Supported Technologies on Information Systems Development Kenneth E. Kendall, Kalle Lyytinen, Janice I. DeGross, 1992. A major research stream in computing focuses on building computing technologies which ease the specification, design, implementation and management of information systems. Any computer solution that frees the developer to interact directly

with users or the physical configuration of the computing technology or improves any feature of the act of delivering a computing application can be called a support technology In this volume the focus is on the impacts of computer assisted software engineering tools CASE tools for group cooperation and collaboration also called group decision support system or GDSS and other computer supported technologies The lead paper by Lyytinen and Kendall provides a framework for the volume showing how the contributions fall into groups revealing the progress of research in each individual area In addition to contributed papers three authors were invited to send lively controversial papers These three articles were written by Bill Curtis Matthias Jarke and Paul Gray
