Cnns Cruise News Report September:

The News About the News Leonard Downie, Jr., Robert G. Kaiser, 2003-02-04 Freedom of the press is a primary American value Good journalism builds communities arms citizens with important information and serves as a public watchdog for civic national and global issues But what happens when the news turns its back on its public role Leonard Downie Jr executive editor of The Washington Post and Robert G Kaiser associate editor and senior correspondent report on a growing crisis in American journalism From the corporatization that leads media moguls to slash content for profit to newsrooms that ignore global crises to report on personal entertainment these veteran journalists chronicle an erosion of independent relevant journalism In the process they make clear why incorruptible reporting is crucial to American society Rooted in interviews and first hand accounts the authors take us inside the politically charged world of one of America s powerful institutions the media

Maritime Casualties Tuuli Messer-Bookman, 2015-08-28 Since the Titanic disaster of 1912 the horrors of major maritime casualties have prompted international conventions and domestic legislation but the link between events and outcomes which are often separated by many years is rarely understood by those working in the maritime industry This book the only comprehensive guide to this link sets forth the major casualties of the last hundred years and explains resulting regulatory changes Taking a macro level view it describes the trends and reactions across decades and how over time focus has shifted from equipment failures to people and their behaviors as the primary cause of maritime casualties Timely and thorough it also explores the alarming increase in the criminalization of maritime accidents especially the relatively recent reclassification of pollution incidents as environmental crimes This book offers broad insight to the history laws and conventions that regulate worldwide commercial maritime activity

Erosion in the American Media and Entertainment Industries Dan Steinbock, 1995-03-30 The book opens with a discussion of the American economy and its macro effects on changes and developments in media and entertainment generally Then in Part I Steinbock looks at broadcasting and cable tracing the former's decline and the latter's rise and then at the multiplication of conglomerates the studios talent agencies home video and syndication companies theme parks and even the emerging producers of interactive multimedia and virtual reality A full section is devoted to all of the major players their corporate struggles with each other including the Time Warner and Paramount M A wars In Part II Steinbock discusses the electronic superhighway and other government initiated policies that will have a significant impact on strategic industry alliances The book concludes with an assessment of how all of the technological economic and political influences emerging today will radically reshape the media entertainment complex not only in the United States but throughout the world

Alternative Views on the September 11 Attacks on New York and Washington: October 2001, 2001 *Missile Contagion* Dennis M. Gormley, 2008-05-30 Most books on missile proliferation focus on the spread of ballistic missiles or cruise missiles not both Gormley's work however explains why cruise missiles are beginning to spread widely but does so by explaining their spread in the context of ballistic missile proliferation It therefore treats both ballistic and cruise missile proliferation as related phenomenon This work also focuses evenhandedly on both nonproliferation and defense policy including missile defenses and counterforce doctrines to fashion a set of integrated strategies for dealing with ballistic and cruise missile proliferation Signs of missile contagion abound In this study Gormley argues that a series of rapid and surprising developments since 2005 suggest that the proliferation of missiles capable of delivering either weapons of mass destruction or highly accurate conventional payloads is approaching a critical threshold The surprising fact is that land attack cruise missiles not ballistic missiles constitute the primary problem Flying under the radar both literally and figuratively land attack cruise missiles add a dangerous new dimension to protecting U S security interests and preventing regional military instability Gormley asserts that cruise missiles are not destined to supplant ballistic missiles rather they are likely to join them because when both are employed together they could severely test even the best missile defenses Worse yet Gormley argues land attack cruise missiles are increasingly being linked to preemptive strike doctrines which are fueling regional arms races and crisis instability This work explains why an epidemic of cruise missile proliferation long forecasted by analysts has only recently begun to occur After first assessing the state of ballistic missile proliferation Gormley explores the role of three factors in shaping the spread of cruise missiles These include specialized knowledge needed for missile development narrative messages about reasons for acquiring cruise missiles and norms of state behavior about missile nonproliferation policy and defense doctrine This book then addresses the policy adjustments needed to stanch the spread of cruise missiles in the first place or barring that cope militarily with a more demanding missile threat consisting of both cruise and ballistic missiles **Naval War College Review**, 2012 [Naval War College Review](#) Naval War College (U.S.), 2000
