An Epidemic of Rumors Jon D. Lee, 2014-01-14 In *An Epidemic of Rumors* Jon D Lee examines the human response to epidemics through the lens of the 2003 SARS epidemic. Societies usually respond to the eruption of disease by constructing stories, jokes, conspiracy theories, legends, and rumors, but these narratives are often more damaging than the diseases they reference. The information disseminated through them is often inaccurate, incorporating xenophobic explanations of the disease's origins and questionable medical information about potential cures and treatment. Folklore studies brings important and useful perspectives to understanding cultural responses to the outbreak of disease. Through this etiological study, Lee shows the similarities between the narratives of the SARS outbreak and the narratives of other contemporary disease outbreaks like AIDS and the H1N1 virus. His analysis suggests that these disease narratives do not spring up with new outbreaks or diseases but are in continuous circulation and are recycled opportunistically. Lee also explores whether this predictability of vernacular disease narratives presents the opportunity to create counter narratives released systematically from the government or medical science to stymie the negative effects of the fearful rumors that so often inflame humanity. With potential for practical application to public health and health policy, *An Epidemic of Rumors* will be of interest to students and scholars of health, medicine, and folklore. *Covering the United States Supreme Court in the Digital Age*

Richard Davis, 2014-08-11 The US Supreme Court seeks to withhold information about its deliberations while the press's job is to report and disseminate this information. These two objectives conflict and create tension between the justices and the reporters who cover them. Add to that the increasing demands for transparency in the digital age and the result is an interesting dynamic between an institution that seeks to preserve its opaqueness and a press corps that demands greater transparency. This volume examines the relationship between justices and the press through chapters that discuss facets such as coverage of the institution, the media's approach to the docket, and the effects of news coverage on public opinion. Additionally, two journalists who cover the court offer insights into the profession of reporting today, while two biographers of Supreme Court justices share the perspectives of those justices regarding the press. *A City on the Edge* Dennis R.

McBride, 2025-09-30 Some years change the course of history. 2020 was one of those years. As a pandemic, lockdowns, and an economic downturn convulsed America, police shootings of George Floyd and other African Americans touched off the largest protest movement in US history. At the same time, mass shootings soared; many states saw unprecedented increases in gun-related incidents. Churning in the background were a bitter presidential election campaign and counterprotests opposing public health measures and the election result itself. Mayors of cities big and small struggled with some of these challenges, but Dennis McBride, the new mayor of a mid-sized, mostly White suburb bordered by the majority-minority City of Milwaukee, called the heartland of the heartland, faced them all. His city, a microcosm of a troubled America teetering on the verge of anarchy while playing a crucial role in the presidential election, *A City on the Edge* is the gripping story of how he and other

mayors have steered America's hometowns through a storm of personal and political divisions. Though the chaos of 2020 has gradually subsided, it is still reverberating in the nation's economy, politics, and psyche. The changes sparked by the events of that historic year continue to vex mayors and their communities. Americans and their leaders are searching for a new equilibrium. That balance will be found first in our hometowns. *A City on the Edge* offers a path forward. **Children and Animals** Frank R. Ascione, 2005. Animal abuse has been an acknowledged problem for centuries, but only within the past few decades has scientific research provided evidence that the maltreatment of animals often overlaps with violence toward people. The perpetrators of such inhumane treatment are often children and adolescents. This book presents current wisdom about the relationship between the maltreatment of animals and violence directed toward other human beings. The author, a noted expert in these areas, writes in a style and presents the findings in a language that will be understandable to parents and teachers. *Channels*, 1990. **TV Guide**, 2002. **Havana Syndrome** Armin Krishnan, 2025-09-04. Havana Syndrome is most likely caused by unknown types of directed energy weapons, either of the acoustic or electromagnetic variety. The technology for such weapons has been under development since at least the 1960s. The first covert attacks on U.S. diplomats may go back to that time when the phenomenon was called the Moscow Signal. Havana Syndrome: A Threat to National Security covers the history of anti-personnel directed energy weapons (DEW) from the Soviet psychotronic weapons that were rumored to exist since the 1970s to the nonlethal weapons developed in the West in the 1980s onward. The book examines the publicly known details of Havana Syndrome and provides some analysis of the U.S. government investigations into Havana Syndrome with respect to what has been declassified. The most likely perpetrators are the Russian or Chinese governments, as some incidents seem to be related to their strategic interests and as both would have the technology to carry out such sophisticated attacks. Havana Syndrome establishes a connection between the Anomalous Health Incidents and what NATO analysts have termed cognitive warfare to speculate about the true purpose of these mysterious attacks. **New York**, 2005-06. *Broadcasting*, 1982-04. **A Violent Heart** Gregory K. Moffatt, 2002-05-30. The author presents a broad perspective on the psychological and sociological roots of aggression, illustrating his analysis with true crime examples. Many of the examples show the relationship between neglect and abuse in early childhood and later violence. **Breaking the News** Alex Marlow, 2021-05-18. From the editor in chief of Breitbart News, the New York Times bestselling must-read Sean Hannity investigation into how the establishment media became weaponized against Donald Trump and his supporters on behalf of the political left. In this timely and important book, Glenn Beck Marlow explains how the establishment press destroyed its own credibility with a relentless stream of fake news designed to smear Donald Trump and his supporters while advancing a leftist agenda. He also reveals key details on how our information gatekeepers truly operate and why America's fake news moment might never end. Breitbart and Trump began banging the drum about fake news during the 2016 election, and it resonated with millions of voters because they intuitively knew the corporate media was willing to say or write
