**Politics and Resistance of Coal in Australia and India** Ruchira Talukdar, 2025-01-31 Since 2009 international climate activism has focused on stopping coalmining in solidarity with local and Indigenous struggles that are resisting coalmining. Based on ethnographic and historic research in Australia and India this book compares the politics and resistance to coal in the two countries particularly focusing on the time period between 2009 and 2018 and the case of the Carmichael coalmine in Queensland and the Mahan coalmine in central India. This book shows differences and similarities in the political economy of coal and creates understanding about the significantly different imperatives and narratives of anti coal environmentalism in Australia and India. Through the Stop Adani movement and its collaboration with the Wangan and Jagalingou Traditional Owners and farmers against coalmining in Queensland and Greenpeace and forest based communities resisting coalmining in Madhya Pradesh Ruchira Talukdar not only explores anti coal movement dynamics but also how these movements grapple with the violation of Indigenous land rights through coal extraction in both places. Drawing on differences and patterns in Australian and Indian anti coal activism this book proposes a global outlook an intersectional framework beyond the singularity of stopping coal that can encapsulate visions for secure futures of communities on the frontlines of fossil fuel struggles for climate activism. The conclusions help to decolonize climate activism as well as make it cognizant of global North South contextual differences for effective solidarity. The author's unique vantage point through experience in environmental activism over 20 years across Australia and India combined with research in both countries makes this book a crucial resource for scholars and practitioners in just transition climate politics and environmental activism across the global North and South.

**Women of the Coal Rushes** David Peetz, Georgina Murray, 2010 Think coal mining and most likely you think men. This book tells a very different story. Women have long been the backbone of the coal mining industry. As wives and mothers they've fought battles for better working conditions, established women's auxiliaries, distributed food to strikers and their families and stood on picket lines. *Australian Journal of Mining*, 2008 [Adani Factor, The Opal Sky](#)

Media, 2025-05-15 An investigative discourse analysis of media reports concerning Indian energy conglomerate The Adani Group surrounding US President Donald Trump's 2025 02 suspension of an SEC indictment of Adani CEO Gautam Adani on bribery and corruption charges. The interactive hyperlink referenced ebook contextualizes Gautam Adani's special friendship to Indian Prime Minister Modi in terms of references to crony Capitalism charting how the Adani Group's energy investments and Ports developments in the Indo Pacific strategically seek to position an India Adani global energy supply route to counter China's Belt Road Initiative BRI. So too it examines how Modi is now positioning Adani in the defence industry teaming with Israeli weapons manufacturers leading activist collective StopAdani to state that Adani is profiting from the genocide in Gaza and investing in US nuclear energy in order to gain access to US defence industry technology and thus secure a place within potential future US war policy against China. The ebook uses a micro level case study of Adani in Australia to chart the

company's workplace neglect violation of indigenous Aboriginal land rights and accusations of racism and human rights violation and places this within a macro level examination of the Adani Group's global strategization of global energy needs and routes as arguable formative war policy      *Global Energy Policy and Security* Walter Leal Filho, Vlasios Voudouris, 2013-09-03 Despite efforts to increase renewables the global energy mix is still likely to be dominated by fossil fuels in the foreseeable future particularly gas for electricity and oil for land air and sea transport The reliance on depleting conventional oil and natural gas resources and the geographic distribution of these reserves can have geopolitical implications for energy importers and exporters *Global Energy Policy and Security* examines the security of global and national energy supplies as well as the sensitivity and impacts of sustainable energy policies which emphasize the various political economic technological financial and social factors that influence energy supply demand and security Multidisciplinary perspectives provide the interrelated topics of energy security and energy policy within a rapidly changing socio political and technological landscape during the 21st century Included are two main types of interdisciplinary papers One set of papers deals with technical aspects of energy efficiency renewable energy and the use of tariffs The other set of papers focuses on social economic or political issues related to energy security and policy also describing research practical projects and other concrete initiatives being performed in different parts of the world This book will prove useful to all those students and researchers interested in the connections between energy production energy use energy security and the role of energy policies      **Econobabble** Richard Denniss, 2021-05-04 Economics is like a tyre lever it can be used to solve a problem or to beat someone over the head What is econobabble We hear it every day when politicians and commentators use incomprehensible economic jargon to dress up their self interest as the national interest to make the absurd seem inevitable or the inequitable seem fair This book exposes the stupid arguments bizarre contradictions and complete lack of evidence upon which much common sense about the economy rests in Australia *Econobabble* is for those who deep down have never believed that it makes sense economic or otherwise to help poor people by slashing public spending on the services they need It's for those who have a sneaking suspicion that it would be cheaper to avoid the effects of climate change than to let them happen and then adapt And it's for those who think pitting public health and aged care against the economy is a false dilemma one that's short sighted callous and potentially dangerous In this new edition Richard Denniss demolishes the tired and misleading arguments of right wing economic experts with humour and precision empowering you to cut through the babble and reach the truth The best guide you'll find to the literal non sense that usually passes for economic debate in this country Ross Gittins      *Queensland Government Mining Journal*, 1919      *Theology and Climate Change* Paul Tyson, 2021-03-29 *Theology and Climate Change* examines Progressive Dominion Theology PDT as a primary cultural driver of anthropogenic climate change PDT is a distinctive and Western form of Christian theology out of which the modern scientific revolution and technological modernity arises Basic attitudes to nature to instrumental power over nature and to an

understanding of humanity's relationship with nature are a function of the deep theological preconditions of Western modernity. Much of what we like about Western modernity is indebted to PDT at the same time that this tacit cultural theology is propelling us towards climate disaster. This text argues that the urgent need to change the fundamental operational assumptions of our way of life is now very hard for us to do because secular modernity is now largely unaware of its tacit theological commitments. Modern consumer society, including the global economy that supports this way of life, could not have the operational signatures it currently has without its distinctive theological origin and its ongoing submerged theological assumptions. Some forms of Christian theology are now acutely aware of this dynamic and are determined to change the modern life world from first assumptions up in order to avert climate disaster. At the same time that other forms of Christian theology aligned with pragmatic fossil fuel interests advance climate change skepticism and overtly uphold PDT, Theology is in fact crucially integral with the politics of climate change but this is not often understood in anything more than simplistic and polemically expedient ways in environmental and policy contexts. This text aims to dis-imbed climate change politics from polarized and unfruitful slinging matches between conservatives and progressives of all or no religious commitments. This fascinating volume is a must read for those with an interest in environmental policy concerns and in culturally embedded first order belief commitments. **The Queensland Industrial Gazette** Queensland.
