AI Driven Deceptive Monetisation Research Jenny Cameron,2025-10-01 The EU AI Act which forbids manipulative practices and permits improved governance represents a step forward in tackling AI driven deceptive monetisation in UX CX designs However obstacles like fragmentation detection difficulties and inconsistent enforcement limits its efficacy Harmonised regulations and cross border collaboration are necessary to maximise impact while striking a balance between consumer protection and innovation Continuous assessment is required as AI develops as mandated by 2029 will be crucial to close gaps and promote trustworthy designs When it comes to using AI to combat deceptive monetisation SMEs face blind spots such as a lack of resources and expertise However scalable solution such as training which is another existing gap and phased frameworks offer practical solutions Using evolving regulations small businesses can boost sustainability trust and responsible innovation While the findings within this report does not suggest that regulators are to blame for the inconsistent enforcement efforts it does highlight concerns about how deceptive monetisation can flourish in the presence of regulatory gaps and weak enforcement As a result it advocates for reform and calls for action There is still a significant gap in understanding how businesses can use responsible AI to close ethical gaps when implementing AI driven monetisation for lawful revenue generation in the UX CX design processes according to the literature review done and presented in this report To counteract the rapid spread of AI deception more dynamic data rich research is required as indicated by the gaps in this study Additionally the framework that regulators use to assess audit transparency needs to be improved particularly when it comes to the use of AI integrations in business UX CX processes which has been terribly undervalued and therefore will be addressed in the central research problem
