Square and the Tower Niall Ferguson, 2019-01-22 The instant New York Times bestseller A brilliant recasting of the turning points in world history including the one we're living through as a collision between old power hierarchies and new social networks Captivating and compelling The New York Times Niall Ferguson has again written a brilliant book In 400 pages you will have restocked your mind Do it The Wall Street Journal The Square and the Tower in addition to being provocative history may prove to be a bellwether work of the Internet Age Christian Science Monitor Most history is hierarchical it's about emperors presidents prime ministers and field marshals It's about states armies and corporations It's about orders from on high Even history from below is often about trade unions and workers parties But what if that's simply because hierarchical institutions create the archives that historians rely on What if we are missing the informal less well documented social networks that are the true sources of power and drivers of change The 21st century has been hailed as the Age of Networks However in The Square and the Tower Niall Ferguson argues that networks have always been with us from the structure of the brain to the food chain from the family tree to freemasonry Throughout history hierarchies housed in high towers have claimed to rule but often real power has resided in the networks in the town square below For it is networks that tend to innovate And it is through networks that revolutionary ideas can contagiously spread Just because conspiracy theorists like to fantasize about such networks doesn't mean they are not real From the cults of ancient Rome to the dynasties of the Renaissance from the founding fathers to Facebook The Square and the Tower tells the story of the rise fall and rise of networks and shows how network theory concepts such as clustering degrees of separation weak ties contagions and phase transitions can transform our understanding of both the past and the present Just as The Ascent of Money put Wall Street into historical perspective so The Square and the Tower does the same for Silicon Valley And it offers a bold prediction about which hierarchies will withstand this latest wave of network disruption and which will be toppled *CQ Weekly*, 2009

Mass Media and Politics

Jan E. How We Win Farah Pandith, 2019-03-12 Drawing on her decades of experience Pandith unweaves the tangled web of extremism and demonstrates how government officials tech CEOs and concerned citizens alike can do their part to defeat it Former Secretary of State Madeleine K Albright There is a war being fought and we are losing it Despite the billions of dollars spent since 9 11 trying to defeat terrorist organizations the so called Islamic State Al Qaeda and other groups remain a terrifying geopolitical threat In some ways the threat has grown worse The 9 11 hijackers came from far away the danger today can come from anywhere from the other side of the world to across the street Unable to stem recruitment we seem doomed to a worsening struggle with a constantly evolving enemy that remains several steps ahead of us Unfortunately current policies seem almost guaranteed not to reduce extremist violence but instead to make it easier for terrorists to spread their hateful ideas recruit new members and carry out attacks We actually possess the means right now to inoculate communities against extremist ideologies In *How We Win* Farah Pandith presents a revolutionary new analysis of global extremism as well as powerful but seldom used strategies for vanquishing it Drawing on her visits to eighty countries the hundreds of interviews and focus groups she's conducted around the world and her high level experience in the Bush and Obama administrations Pandith argues for a paradigm shift in our approach to combat extremism one that mobilizes the expertise and resources of diplomats corporate leaders mental health experts social scientists entrepreneurs local communities and most of all global youth themselves There is a war being fought and we can win it This is how

Civic

Capitalism Nicholas Frank Hugo Greiner, Nick Greiner, 1995 **What Liberal Media?** Eric Alterman, 2003-02-05 Refuting the claim that mainstream media has a liberal slant the author exposes the fallacy of a left wing conspiracy arguing that it is corporate news structure that determines what the public sees and hears in broadcast or print media *Politics*, 2009

Black Social Capital Marion Orr, 1999 Deindustrialization white flight and inner city poverty have spelled trouble for Baltimore schools Marion Orr now examines why school reform has been difficult to achieve there revealing the struggles of civic leaders and the limitations placed on Baltimore's African American community as each has tried to rescue a failing school system Examining the interplay between government and society Orr presents the first systematic analysis of social capital both within the African American community black social capital and outside it where social capital crosses racial lines Orr shows that while black social capital may have created solidarity against white domination in Baltimore it hampered African American leaders capacity to enlist the cooperation from white corporate elites and suburban residents needed for school reform Orr examines social capital at the neighborhood level in elite level interactions and in intergovernmental relations to argue that black social capital doesn't necessarily translate into the kind of intergroup coalition needed to bring about school reform He also includes an extensive historical survey of the black community showing how distrust engendered by past black experiences has hampered the formation of significant intergroup social capital The book features case studies of school reform activity including the first analysis of the politics surrounding Baltimore's decision to hire a private for profit firm to operate nine of its public schools These cases illuminate the paradoxical aspects of black social capital in citywide school reform while offering critical perspectives on current debates about privatization site based management and other reform alternatives Orr's book challenges those who argue that social capital alone can solve fundamentally political problems by purely social means and questions the efficacy of either privatization or black community power to reform urban schools Black Social Capital offers a cogent conceptual synthesis of social capital theory and urban regime theory that demonstrates the importance of government politics and leadership in converting social capital into a resource that can be mobilized for effective social change **The Effectiveness of Entertainment-education as Media Health Campaigns**

Byoungkwan Lee, 2004 *Javnost*, 1996 *Networks and Netwars* John Arquilla, David F. Ronfeldt, 2001 Netwar like cyberwar describes a new spectrum of conflict that is emerging in the wake of the information revolution Netwar includes conflicts waged on the one hand by terrorists criminals gangs and ethnic extremists and by civil society activists such as cyber activists or WTO protestors on the other What distinguishes netwar is the networked organizational structure of its practitioners with many groups actually being leaderless and their quickness in coming together in swarming attacks To confront this new type of conflict it is crucial for governments military and law enforcement to begin networking themselves
