

Anaconda

Do you want to know what snake is the biggest in the world? It is the anaconda! The anaconda can weigh 550 pounds and grow up to 29 feet long. The anaconda lives in the rainforests of South America and likes wet places like swamps and rivers. Anacondas are **carnivores**, or meat eaters, that eat animals like birds and wild pigs. They do not have venom and instead squeeze their prey until they cannot breathe. The anaconda has a special talent. Because they have a stretchy jaw, they can eat their prey in one gulp! After it eats a huge meal, the anaconda can go for weeks or months without eating again. Female anacondas give birth to many live babies that are ready to swim and hunt right after they are born.
