Radford, 1997-07-17 The basic theme of this volume is excellent Readers are treated to fascinating explorations of communication at the boundaries between discourses and selves The essays address important theoretical issues and do so often by treating significant social issues Most welcome is the constructive tone that is for the most part maintained throughout the volume demonstrating an effort to understand engage and critically assess different discourses and selves and others at once without valorizing one over the other An essential theme running through this volume is the idea that our efforts to engage as well as other s efforts to engage us have been

seriously impaired because of problems which are fundamentally communicative in nature More specifically there is general agreement among the contributors that the voice of other has not been sufficiently heard and this on account of how discourses of the human sciences as well as other dominant discourses e g law have structured our interaction with other Each of the essays helps to clarify the nature of the communicative failing and to develop an appropriate corrective action
