

What is CMS's Hierarchical Condition Categories?

- **Medicare Risk Adjustment** payment model introduced by the Centers for Medicare and Medicaid (CMS) in 2004.
- The goal is to pay Medicare Advantage (MA) accurately and fairly by adjusting payment for Enrollees based on their **demographics** and their **health status**.
- This Risk Adjustment payment model measures the disease burden that includes 70 HCC categories, which are correlated to diagnosis codes.
- Accurate diagnosis code documentation (ICD-9 CM) and reporting now determines reimbursement.
 - **3,600 ICD-9 codes map to 1 of 79 HCCs** (mostly chronic but some are acute)

utilization 4 Incorrect coding 5 Inferior or non existent HCC specific analysis and prioritization The Medicare Annual Wellness Visit AWV is a yearly preventative care visit offered at no cost to all Medicare Part B beneficiaries The purpose of the visit is to identify patient risk factors and plan for future preventative service needs This visit is well reimbursed and can be conducted by any licensed health professional or a team of professionals under the direct supervision of a physician While the AWV is recognized as an important benefit 82 3% of Medicare beneficiaries did not receive an AWV in 2015 The bottom line is that patients want time with their physicians to discuss their health Our clients have professed repeatedly that they see a difference in patient engagement as they capture more AWWs With changes like value based purchasing putting revenue at risk accurate documentation is even more critical A good physician query process helps but relying on queries alone leaves money on the table You need to prevent documentation errors from happening in the first place by getting your physicians to pay closer attention to what they write down The medical record should tell a story Coding specialist need to understand what the physician is thinking and know when the provider isn t documenting the complete information to assign the most specific diagnosis code Ensure that all opportunities for documentation improvement are identified For the medical record to be accurate and timely a physician query process should be in place Ongoing chart reviews and provider education reinforces the essential points of good documentation and helps to bridge the gap between what the provider needs clinically documented in the medical record from one visit to the next and the coding guidelines that are required to support the codes being submitted
