

## Standard CMU Block Wall Detail

The purpose of this Information Bulletin is to assist owners and builders who may choose to erect simple freestanding concrete masonry unit (CMU) block walls using the Department's standard detail. This Information Bulletin provides general requirements and specifications for the construction of standard CMU block walls of various height, thickness or footing configurations. These walls are designed for the average condition and may not be suitable in all cases. Where the proposed wall construction is located on a site with slope steeper than 10%, with adverse soil conditions (e.g., expansive soil, liquefaction, flood hazard, etc.) or deviates from this Information Bulletin, a registered design professional licensed in the State of California should be consulted.

### GENERAL ZONING REQUIREMENTS:

For zoning code purposes, fence height shall be measured from grade adjoining the fence on the public right-of-way side of the fence and/or from the average grade of both sides of the fence between two private properties. For lots that slope more than 5'-0" from front to rear, contact a Planning staff at the Development Services Center to help establish the fence height. A 6'-0" corner cutoff may be required for fencing adjacent to driveways and sidewalks that obstruct visibility.
