The Cult of the Presidency Gene Healy, 2009-05-01 The Bush years have given rise to fears of a resurgent Imperial Presidency Those fears are justified but the problem cannot be solved simply by bringing a new administration to power In his provocative new book *The Cult of the Presidency* Gene Healy argues that the fault lies not in our leaders but in ourselves When our scholars lionize presidents who break free from constitutional restraints when our columnists and talking heads repeatedly call upon the commander in chief to dream great dreams and seek the power to achieve them when voters look to the president for salvation from all problems great and small should we really be surprised that the presidency has burst its constitutional bonds and grown powerful enough to threaten American liberty Interweaving historical scholarship legal analysis and trenchant cultural commentary *The Cult of the Presidency* traces America's decades long drift from the Framers vision for the presidency a constitutionally constrained chief magistrate charged with faithful execution of the laws Restoring that vision will require a Congress and a Court willing to check executive power but Healy emphasizes that there is no simple legislative or judicial fix to the problems of the presidency Unless Americans change what we ask of the office no longer demanding what we should not want and cannot have we'll get what in a sense we deserve

Wilding of America Charles Derber, 2009-12-14 The American dream champions individualism But at what price In the fully updated fifth edition of *The Wilding of America* Charles Derber chronicles the latest incidents of wilding acts of self interested violence or greed that weaken the social fabric The new edition examines such topics as the recent doping

scandals in sports government sponsored torture new threats to our public space social infrastructure and natural environment the effects of the Obama administration on wilding behavior and in an all new chapter the 2008 Wall Street meltdown Book jacket

Disaster Policy and Politics Richard T. Sylves, 2019-02-13 Disaster Policy and Politics combines evidence based research with mini case studies of recent events to demonstrate the fundamental principles of emergency management and to explore the impact that disasters have had on U S policy Paying special attention to the role of key actors decision makers at the federal state and local levels scientists engineers civil and military personnel and first responders author Richard Sylves explores how researchers contribute to and engage in disaster policy development and management The highly anticipated Third Edition explores the radical change in policy and politics after the occurrence of recent disasters such as hurricanes Irma Maria and Harvey Hawaii s false nuclear attack warning and responses to U S wildfires The book s comprehensive all hazards approach introduces students to the important public policy organizational management and leadership issues they may need as future practitioners and leaders in the field

Atlas of Forecasts Katy Börner, 2021-08-31 Forecasting the future with advanced data models and visualizations To envision and create the futures we want society needs an appropriate understanding of the likely impact of alternative actions Data models and visualizations offer a way to understand and intelligently manage complex interlinked systems in science and technology education and policymaking Atlas of Forecasts from the creator of Atlas of Science and Atlas of Knowledge shows how we can use data to predict communicate and ultimately attain desirable futures Using advanced data visualizations to introduce different types of computational models Atlas of Forecasts demonstrates how models can inform effective decision making in education science technology and policymaking The models and maps presented aim to help anyone understand key processes and outcomes of complex systems dynamics including which human skills are needed in an

artificial intelligence empowered economy what progress in science and technology is likely to be made and how policymakers can future proof regions or nations This Atlas offers a driver's seat perspective for a test drive of the future

The Polling Report, 2005 F & S Index United States Annual, 2007 *Broadcasting & Cable*, 2007-07 **No Questions Asked** Lisa Finnegan, 2006-11-30 No Questions Asked takes an overarching view of media coverage from the day of the 9/11 attacks through the war in Iraq It also compares and contrasts how the U.S. media vs international media covered key events during this period Fact based rather than polemical the book explains why journalists responded the way they did during wartime and explores the ramifications for democracy of a weak press The Fourth Estate's most important job is to present unbiased accurate information about events issues and policies to the public Without public scrutiny administrations can become a breeding ground for bad and dangerous ideas In recent years for several reasons including the brilliant psychological manipulation of the nation after the September 11 2001 attacks the American media have allowed administration officials to present information to the public without having to worry much about answering uncomfortable questions or having their policies deconstructed for public consumption Relevant information is buried deep inside newspapers and gaping holes can be found in many stories in short obvious and important questions remain unasked The lack of questions from reporters led to a misunderstanding of the facts by the American public and consequently to their support of policies based on misinformation Polls have revealed that more than half of Americans believe mistruths about the war in Iraq and world terrorism Many including members of the media say the press has failed to do its job Very few news reports filled in the basic blanks the who what where when and whys about U.S. foreign policy the USA Patriot Act the administration's insistence on the need for secrecy and more power the truth about weapons of mass destruction in Iraq and the necessity of sending our soldiers to topple another country's dictator throwing an already tenuous region into dangerous imbalance Very few reports are filling in those blanks now Hurricane Katrina Symposium, 2007 Reporting for the Media John R. Bender, 2009 Now in its ninth edition Reporting for the Media continues to be an essential resource for journalism students and instructors A comprehensive introduction to newswriting and reporting this classic text offers a straightforward guide to crafting effective journalism Moreover it grounds students firmly in the basics of reporting how to become more curious about the world generate provocative ideas gather vital information and write incisive stories The authors provide students with the skills they need to produce engaging journalism by focusing on such central topics as grammar basics newswriting style traditional story structures and styles interviewing techniques reporting on speeches and meetings and common ethical dilemmas The text also explores a variety of advanced topics including broadcast writing law ethics and public relations In every chapter students encounter vital tools for the creation of versatile journalism these tools enable them to apply their knowledge to any type of journalism in any medium The ninth edition features a new introductory chapter Journalism Today which discusses recent developments in the field from technology and newsroom convergence to

the proliferation of blogs In addition all chapters and examples have been updated throughout The text s lively end of chapter exercises have also been updated and continue to encourage students to learn by doing through the practical application of skills An updated list of Common Writing Errors is now featured on the inside back cover along with a condensed version of the AP stylebook this resource offers helpful grammar and style assistance to students as they interact with the material As in previous editions the book also integrates advice from professional journalists discussion questions suggested projects four useful appendices and end of chapter checklists The leading text for newswriting and reporting courses Reporting for the Media Ninth Edition offers outstanding and unparalleled training for dynamic journalists **Proceedings** ,1999 **The Hollywood Reporter** ,2008 *Term Paper Resource Guide to African American History* Caryn E. Neumann,2009-04-30 Includes bibliographical references and index **System Under Stress: Homeland Security and American Politics, 2nd Edition** Donald F Kettl,2006-12-08 Listen to Donald Kettl on his interview from BAD Homeland Security Inside BAD Out BAD Click Here to ListenDonald Kettl InterviewInterview from Homeland Security Inside and Out which airs on KAMU Interview air date May 20 2008 WINNER OF THE LOUIS BROWNLOW BOOK AWARD The massive bureaucratic reorganization under the Department of Homeland Security was a response to the system wide coordination problems brought to light on 9 11 Better planning new leadership and far reaching reform were to demonstrate that the U S had learned its lessons well that it would be prepared for the next attack or disaster But the catastrophic response to Hurricane Katrina unequivocally showed how this restructuring has not brought about the kinds of long term policy changes that are necessary to deal effectively and efficiently with threats BAD whether manmade or natural Is the system permanently broken Should FEMA be removed from DHS or abolished altogether Donald Kettl in this thoroughly updated second edition takes a hard look at the most recent stress on the system He explores how the 9 11 Commission forever changed public discourse on the topic as well as discusses the ways in which FEMA might be reformed The country faces solvable problems he argues yet is in dire need of new leadership at every level In his brief gripping narrative Kettl assesses how well the U S political system responds under extraordinary pressure and asks if the focus will continue to be on fighting the last war There is small chance the catastrophe that lies ahead will replicate the last one Is the government ready to face that next challenge U.S. News & World Report ,1992 *Spinning Intelligence* Robert Dover,Michael S. Goodman,2009 Throughout the twentieth century especially during wartime and the Cold War intelligence agents routinely used the media to publish and broadcast material that would deceive external enemies thwart domestic subversion or simply to change the way readers thought about fascism or communism Today stories are channelled to journalists in order to promote a news agenda deemed favourable to MI5 MI6 or to the CIA or to spin the coverage of key issues Investigative reporters often have a more adversarial relationship with the security services seeing them as over mighty agents of the state who should be subjected to forensic scrutiny of what they get up too allegedly for the public good The furore over rendition of terrorist suspects by the CIA and the complicity of

British agencies in this process is but one example of journalists uncovering practices that the intelligence community would rather have kept secret. The contributors to this book, drawn from former intelligence officers, the media, and academia, explore this intriguing and often fraught contest, shedding light on many hitherto unknown aspects of the intriguing and symbiotic relationship between the second oldest profession and the print and broadcast media. Speaking from the perspective of the journalist are Chapman Pincher and Gordon Corera, Security Editor BBC, whose essays trace the evolving relationship between news media outlets and the government, especially with regards to advances in technology. Reporting from the perspective of the political institution are Sir David Omand, Nick Wilkinson, Michael Goodman, and Anthony Campbell, who explain governmental oversight of intelligence agencies, the operation of clandestine information units, and the laws that govern the control of information. Richard Aldrich investigates the exploitation of the globalized media by intelligence agencies. Scott Lucas and Steve Hewitt tackle the CIA's use of open sources for intelligence purposes, and Wyn Bowen examines the real world use of open source intelligence in rolling back Libya's nuclear program. Robert Dover and Pierre Lethier explore the depiction of intelligence in popular culture, a practice that helped create rendition and facilitate torture and condition our responses to both. In the final essay, Patrick Porter focuses on cultural representations of the war on terror.
