Dale C. Maley, 2016-12-26 Fairbury is a small town located in Central Illinois It is 100 miles south of Chicago and 60 miles east of Peoria It was founded in 1857 when the railroad first crossed Central Illinois In 1861 John Marsh and son Henry Marsh dug 180 feet down just west of Fairbury and found coal Their discovery of coal in the Illinois prairie prompted the discovery of more coal through out Central Illinois Fairbury quickly had three main operating coal mines These mines created jobs that attracted miners all the way from Europe The population of Fairbury exploded from 269 in 1860 to 2 324 in 1890 The largest coal mine continued to operate until 1941 It is hoped this book helps to inform current Fairbury residents about how important coal mining was to the development of Fairbury      *Southern Illinois Coal* Herbert K.

Russell, 2017-06-19 The coal mining photographs of C William Horrell taken across the southern Illinois Coal Belt over a twenty year period from 1966 to 1986 are extraordinary examples of documentary photography so stark and striking that captions often seem superfluous Horrell s photographs capture the varied phenomena of twentieth century coal mining technology the awesome scale of surface mining machines and their impact on the land massive machines forced into narrow passageways with inches to spare as they carry coal from the face to conveyer belts and more significant the advent of continuous miners machines that can handle four previously separate processes and which have been a fixture in underground or deep mines since the mid 1960s Horrell was also intrigued by the related activities of mining including coal s processing cleaning and transportation as well as the daily behind the scenes operations that keep mines and miners working His photographs reflect the beauty of the commonplace the clothes of the miners their dinner pails and their tools and reveal the picturesque remnants of closed mines the weathered boards of company houses the imposing iron beauty of an ancient tippie and an abandoned building against the lowering sky of an approaching storm Finally his portraits of coal miners show

the strength dignity and enduring spirit of the men and women who work the southern Illinois coal mines      **Labor, Loyalty, and Rebellion** Carl R. Weinberg,2005-04-28 On April 5 1918 as American troops fought German forces on the Western Front German American coal miner Robert Prager was hanged from a tree outside Collinsville Illinois having been accused of disloyal utterances about the United States and chased out of town by a mob In Labor Loyalty and Rebellion Southwestern Illinois Coal Miners and World War I Carl R Weinberg offers a new perspective on the Prager lynching and confronts the widely accepted belief among labor historians that workers benefited from demonstrating loyalty to the nation The first published study of wartime strikes in southwestern Illinois is a powerful look at a group of people whose labor was essential to the war economy but whose instincts for class solidarity spawned a rebellion against mine owners both during and after the war At the same time their patriotism wreaked violent working class disunity that crested in the brutal murder of an immigrant worker Weinberg argues that the heightened patriotism of the Prager lynching masked deep class tensions within the mining communities of southwestern Illinois that exploded after the Great War ended      **Death Underground** Robert E Hartley,David Kenney,2006-07-24 Death Underground The Centralia and West Frankfort Mine Disasters examines two of the most devastating coal mine disasters in United States history since 1928 In two southern Illinois towns only forty miles apart explosions killed 111 men at the Centralia No 5 mine in 1947 and 119 men at the New Orient No 2 mine in West Frankfort in 1951 Robert E Hartley and David Kenney explain the causes of the accidents identify who was to blame and detail the emotional impact the disasters had on the survivors their families and their communities Politics at the highest level of Illinois government played a critical role in the conditions that led to the accidents Hartley and Kenney address how safety was compromised when inspection reports were widely ignored by state mining officials and mine company supervisors Highlighted is the role of Driscoll Scanlan a state inspector at Centralia who warned of an impending disaster but whose political enemies shifted the blame to him ruining his career Hartley and Kenney also detail the New Orient No 2 mine explosion the attempts at rescue and the resulting political spin circulated by labor management and the state bureaucracy They outline the investigation the subsequent hearings and the efforts in Congress to legislate greater mine safety Hartley and Kenney include interviews with the survivors a summary of the investigative records and an analysis of the causes of both mine accidents They place responsibility for the disasters on individual mine owners labor unions and state officials providing new interpretations not previously presented in the literature Augmented by twenty nine illustrations the volume also covers the history culture and ethnic pluralism of coal mining in Illinois and the United States      **Illinois History** ,1988

O. Andros,1915 Hard As the Rock Itself David Robertson,2011-05-18

The first intensive analysis of sense of place in American mining towns Hard as the Rock Itself Place and Identity in the American Mining Town provides rare insight into the struggles and rewards of life in these communities David Robertson contends that these communities often characterized in scholarly and literary works as derelict as sources of debasing moral influence and as scenes of environmental decay have a strong and enduring sense of place and have even embraced some of the signs of so called dereliction Robertson documents the history of Toluca Illinois Cokedale Colorado and Picher Oklahoma from the mineral discovery phase through mine closure telling for the first time how these century old mining towns have survived and how sense of place has played a vital role Acknowledging the hardships that mining s social environmental and economic legacies have created for current residents Robertson argues that the industry s influences also have contributed to the creation of strong cohesive communities in which residents have always identified with the severe landscape and challenging but rewarding way of life Robertson contends that the tough unpretentious appearance of mining landscapes mirrors qualities that residents value in themselves confirming that a strong sense of place in mining regions as elsewhere is not necessarily wedded to an attractive aesthetic or even to a thriving economy **Reckoning at Eagle Creek** Jeff

Biggers,2010-01-26 Cultural historian Jeff Biggers takes us to the dark amphitheatre ruins of his family s nearly 200 year old hillside homestead that has been strip mined on the edge of the first federally recognized Wilderness Site in southern Illinois In doing so he not only comes to grips with his own denied backwoods heritage but also chronicles a dark and missing chapter in the American experience the historical nightmare of coal outside of Appalachia serving as an expos of a secret legacy of shame and resiliency **Proceedings of the ...
