Coal Mining Companies Closing:

Managing Decline Suzanne Culter, 1999-05-01 Industrial restructuring has become a way of life the inevitable accommodation to rapid changes in technology to a global economy that affects large and small communities through the constant flow of goods and people and to the challenging patterns of economic viability that alter that flow *Managing Decline* examines the impact of coal mine closures in Yubari City Hokkaido once one of Japan's most prosperous coal producing cities and asks how Japanese culture has influenced the enactment of and response to industrial policy for restructuring in this community For many years coal formed the backbone of Japan's economic development but the dangers and costs of mining became increasingly expensive for the industry and government Global changes in coal production and exchange finally prompted Japan's decision in 1986 to shut down nearly all domestic coal mines in favor of coal imports Japan's policy for industry restructuring has been applauded as one of the most comprehensive in addressing the needs of the industry the workers and the community At the micro level however the people in the community most affected by the policy decisions have been excluded from the process *Managing Decline* reveals the stratified effects as well as compensation for the different groups in Yubari Although the policy settlement package goes to the coal miners community redevelopment ignores their needs prompting them to leave the city and benefiting instead land owners and public employees Revealed as well as the ways in which Japan's cultural values particularly the vertical social structure as it affects decision making status occupations and company organization and the importance of maintaining the family system figure in the policy process and its consequences The author's research based on two years residence in Yubari during the last few years of the closures makes an important contribution to community studies of social change in Japan It is also the first field study to examine the effects of industrial policy for restructuring in Japan at the worker and community level *Coal Mining Communities and Gentrification in Japan* Tai Wei Lim, Naoko Shimazaki, Yoshihisa Godo, Yiru Lim, 2019-05-06 This book offers a multidisciplinary analysis of approach in the field of energy studies of Japan examining post closure coal mining towns in Japan and their gentrification It considers the impact of closures on the agricultural industry the re absorption of laid off coal miners into service and industrial sectors and the gentrification of former coal mines into agricultural farms and communities It also considers the historical process of gentrification in terms of origins social history continuity discontinuity and cooperation resistance The historical background of coal mine closures analyses nostalgic recollection about mine closures and Sakubei's UNESCO drawings of life in the coal mines and other cultural materials related to coal energy and the mining industry in general in Japan **Recent Developments in the Coalmining Industry** International Labour Organisation. Sectoral Activities Programme, International Labour Organisation. Coal Mines Committee, 1994 *Mine Closure and Its Impact on the Community* Michael Haney, Maria Shkaratan, 2003 Against the backdrop of economic transition several countries in Eastern Europe have undertaken far reaching programs to restructure their coal sectors which in the 1990s

were in a state of deep crisis One aspect of restructuring has been the closure of loss making mines which are often located in communities where the coal industry is the dominant employer and the significant downsizing of the workforce Mitigation efforts that are implemented at the time of mine closure such as severance payments are usually intended only for the laid off workers Haney and Shkaratan examine the impact of mine closure on the entire community five years after mine closure in Romania Russia and Ukraine Using quantitative and qualitative research methods and based on interviews with national regional and local experts and members of the affected population the authors describe the effect of mine closure and evaluate the various mitigation efforts that have been used by governments in such cases They conclude with policy recommendations of broad relevance to programs of industrial restructuring in communities dominated by a single industry This paper a product of the Infrastructure and Energy Services Department Europe and Central Asia Region is part of a larger effort in the region to evaluate the social impact of industrial restructuring Mine Closure N.C. Saxena,2008-09-01 Mining is basically an intermediate use of land and it causes various impacts on all the components of environment In most situations the impacts on land are severe and may cause the land to become useless for any economic use after mining Since the mining companies take land areas which have been in various uses before the onset of mining activities it should have been obligatory for the companies to develop the land areas for uses most suitable for the economic activities after mining Though this was known right from the inception of the mining activities the efforts towards developing the land after mining were negligible This has resulted in devastation of mined out land in many locations in the country Keeping in view the importance and the necessity of development of land areas legislation have been formulated for mine closure The legislation are recent not many mines have been closed in accordance with the provisions therein A lot of work is still required to be done to make mine closure really effective All over the world the importance of the mine closure is being realized due mainly to the following reasons Closure planning at all the stages in a mine s life is important to the economics of a mine and such a planning results in a large cost savings In this book the following aspects of mine closure planning and implementation in the opencast and underground mines with special reference to the mining situations in the India have been outlined 1 Impacts of mining on environmental components and their roles in mine closure planning 2 Legal social and economic necessity of mine closure 3 Land use planning as a tool for mine closure planning and implementation 4 How to incorporate mine closure in mine planning 5 Mine closure planning in underground and opencast mines 6 Implications of mine fires in mine closure 7 Mine closure planning for small mines 8 Taking care of the abandoned mines i e closure of abandoned mines 9 Economics of mine closure 10 Management of ecology during mine closure The book is expected to be useful to the practical mining engineers and environmen talists in mine planning and design It should also be useful to the researchers and students of mining and environment *The Coal Trade Bulletin* ,1921 When the Mines Closed Thomas Dublin,1998 The anthracite region of northeastern Pennsylvania five hundred square miles of rugged hills stretching between Tower City and Carbondale

harbored coal deposits that once heated virtually all the homes and businesses in Eastern cities At its peak during World War I the coal industry here employed 170 000 miners and supported almost 1 000 000 people Today with coal workers numbering 1 500 only 5 000 people depend on the industry for their livelihood Between these two points in time lies a story of industrial decline of working people facing incremental and cataclysmic changes in their world When the Mines Closed tells this story in the words of men and women who experienced these dramatic changes and in more than eighty photographs of these individuals their families and the larger community Award winning historian Thomas Dublin interviewed a cross section of residents and migrants from the region who gave their own accounts of their work and family lives before and after the mines closed Most of the narrators six men and seven women came of age during the Great Depression and entered area mines or in the case of the women garment factories in their teens They describe the difficult choices they faced and the long standing ethnic working class values and traditions they drew upon when after World War II the mines began to shut down Some left the region others commuted to work at a distance still others struggled to find employment locally The photographs taken by George Harvan a lifelong resident of the area and the son of a Slovak born coal miner document residents lives over the course of fifty years Dublin s introductory essay offers a brief history of anthracite mining and the region and establishes a broader interpretive framework for the narratives and photographs
