The coal mining industry is losing jobs, which is affecting workers mostly in rural communities. So how are those workers faring after being laid off?

From 1989 to 2017, the number of coal mines in Canada decreased by almost 50%, while coal production fell 13.6%.

2015

Of all male and female employees aged 20 to 64 who were employed in this sector, roughly **300 were laid off annually**, on average, from 1995 to 2015.

Fortunately, from 1995 to 2015, on average,

75%

of workers laid off from coal mining had paid employment in the year after losing their job.

About **20%** of these workers found paid employment in **mining, quarrying, oil and gas extraction** in the year after losing their job.

Another **20%** found paid employment in **highly skilled services**.

DID YOU KNOW?

After 2013, the sharp rise in layoff rates in coal mining coincided with a substantial increase in layoff rates in oil and gas extraction, which in turn was associated with a decrease in oil prices.
