Coal Mining Our Future Sticker:

The Coal Trap James M. Van Nostrand, 2022-07-21 Between 2009 and 2019 West Virginian politicians aligned themselves with the interests of the coal industry to the substantial detriment of the citizens and economy of the state. Despite the undeniable low carbon transformation that was occurring in the energy industry in the US during this period, state political leaders doubled down on coal. Rather than provide the leadership necessary to manage the transition of the state's economic drivers away from fossil fuels, they largely blamed the demise of the coal industry on the federal government. At every turn, the interests of the coal industry were placed above the economic and environmental health of West Virginians. James Van Nostrand tells the story of why West Virginia now faces overwhelming obstacles to competing in the economic marketplace of the twenty-first century. The book serves as a warning of how a fair energy transition can be derailed by political failure.

Water in Kentucky Brian D. Lee, Daniel I. Carey, Alice L. Jones, 2017-07-07 Home to sprawling Appalachian forests, rolling prairies, and the longest cave system in the world, Kentucky is among the most ecologically diverse states in the nation. Lakes, rivers, and springs have shaped and nourished life in the Commonwealth for centuries, and water has played a pivotal role in determining Kentucky's physical, cultural, and economic landscapes. The management and preservation of this precious natural resource remain a priority for the state's government and citizens. In this generously illustrated book, experts from a variety of fields explain how water has defined regions across the Commonwealth. Together, they illuminate the ways in which this resource has affected the lives of Kentuckians since the state's settlement, exploring the complex relationship among humans, landscapes, and waterways. They examine topics such as water quality, erosion, and sediment control, and emerging water management approaches. Through detailed analysis and case studies, the contributors offer scholars, practitioners, policy makers, and general readers a wide perspective on the state's valuable water resources.

Coal and Coal Trade Journal, 1926 *No Good Alternative* William T. Vollmann, 2019-07-02 The most honest book about climate change yet. The Atlantic. The Infinite Jest of climate books. The Baffler. An eye-opening look at the consequences of coal mining and oil and natural gas production, the second of a two-volume work by award-winning author William T. Vollmann on the ideologies of energy production and the causes of climate change. The second volume of William T. Vollmann's epic book about the factors and human actions that have led to global warming begins in the coal fields of West Virginia and Eastern Kentucky, where America's best friend is not merely a fuel but a heritage. Over the course of four years, Vollmann finds hollowed-out towns with coal-polluted streams and acidified drinking water, makes covert visits to mountaintop removal mines, and offers documented accounts of unpaid fines for federal health and safety violations and of miners who died because their bosses cut corners to make more money. To write about natural gas, Vollmann journeys to Greeley, Colorado, where he interviews anti-fracking activists, a city planner, and a homeowner with serious health issues from fracking. Turning to oil production, he speaks with, among others, the former CEO of Conoco and a vice president of the Bank of Oklahoma in

charge of energy loans and conducts furtive roadside interviews of guest workers performing oil related contract labor in the United Arab Emirates As with its predecessor No Immediate Danger this volume seeks to understand and listen not to lay blame except in a few corporate and political cases where outrage is clearly due Vollmann is a carbon burner just like the rest of us he describes and quantifies his own power use then looks around him trying to explain to the future why it was that we went against scientific consensus continually increasing the demand for electric power and insisting that we had no good alternative *United Mine Workers Journal* United Mine Workers of America,2000 **Sawards' Coal Freight Circular** Frederick Edward Seward,1930 **The Reader's Digest** DeWitt Wallace,Lila Acheson Wallace,1981 **Coal Age** ,1982 Vols for 1955 62 include Mining guidebook and buying directory **Decisions and Orders of the National Labor Relations Board** United States.
