technology we still monitor the weather Wait Five Minutes Weatherlore in the Twenty First Century draws from folkloric literary and scientific theory to offer up new ways of thinking about this most ancient of phenomena Weatherlore is a concept that describes the folk beliefs and traditions about the weather that are passed down casually among groups of people Weatherlore can be predictive such as the belief that more black than brown fuzz on a woolly bear caterpillar signals a harsh winter It can be the familiar commentary that eases daily social interactions such as asking Is it hot or cold enough for you Other times it is simply ubiquitous If you don't like the weather wait five minutes and it will change From detailing personal experiences at picnics and suburban lawns to critically analyzing storm stories novels and flood legends contributors offer engaging multidisciplinary perspectives on weatherlore As we move further into the twenty first century an increasing awareness of climate change and its impacts on daily life calls for a folkloristic reckoning with the weather and a rising need to examine vernacular understandings of weather and climate Weatherlore helps us understand and shape global political conversations about climate change and biopolitics at the same time that it influences individual group and regional lives and identities We use weather and thus its folklore to make meaning of ourselves our groups and quite literally our world The History of the Oxford Canning Club, from 1861-1911 University of Oxford.
