Volsko, Sherry Barnhart, 2022-05-25 *Foundations in Neonatal and Pediatric Respiratory Care* is unique. The approach and layout of each chapter is standardized much like the format for scientific papers published in medical journals. Each chapter provides the reader with a thorough review of the literature on the subject and the text is written in a clear and concise manner. Illustrations, tables, and figures enhance the learning experience. The supplemental web-based materials provide relevant evidence-based materials to enhance the reader's current practice and prepare them for the exam.

Case Profiles in Respiratory Care William A. French, 2000. This comprehensive text presents readers with a broad range of cases/scenarios in respiratory care that help develop important critical thinking skills in information gathering and decision making. Readers are exposed to the real-life ethical dilemmas confronting medical workers in today's more technologically advanced health care environment, including treatment of the terminally ill. In addition, readers are exposed to a variety of medical laboratory tests and practices in the different settings they are likely to encounter in respiratory care. This second edition text includes not only the important skills and practices required in respiratory care but also the challenging dilemmas health care workers face on the job.
