Minority and Cross-cultural Aspects of Neuropsychological Assessment F.R.

Ferraro, 2002-01-01. Minority and Cross Cultural Neuropsychological Assessment pulls together neuropsychological assessment issues across a wide range of minority groups and populations currently underserved. Included are chapters related to African Americans Asian Pacific Islanders Hispanic Latinos Native Americans and Rural Populations. Some minority groups have not been as widely studied or examined as other groups from a neuropsychological assessment perspective. This book will fill this obvious void. Other chapters are devoted to traditions and trends in clinical neuropsychology and there is a section that examines the future of minority and cross cultural issues in neuropsychological assessment. The current literature regarding minority and cross cultural issues in neuropsychological assessment is quite scattered and it is the goal of this book to provide a more thorough review and refinement of the issues presented.

Handbook of Traumatic Brain Injury and Neurodegeneration Rudy J. Castellani, 2020-04-15. Holbourne's theory that rotational head movement and shear strains were limiting factors in producing acute parenchymal brain damage was a watershed moment in understanding traumatic brain injury (TBI). Long term effects and in particular neurodegenerative proteinopathy subsequent to TBI remain theoretical notwithstanding the poorly understood punch drunk syndrome of the early and mid 20th century and the 21st century concept of chronic traumatic encephalopathy. This book, the Handbook of Traumatic Brain Injury and Neurodegeneration, has as its theme the marriage between neurodegenerative disease and neurotrauma through TBI surrogates such as sport military service and experimental models and the legitimacy of that marriage. In the 32 contributions included here this handbook not only explores the deleterious effects of genuine TBI but also and more

importantly the relationship between TBI and neurodegeneration Controversy notwithstanding there is much to be learned about the biological effects of TBI substrates for long term sequelae the relationship between TBI and diverse neuropsychiatric disorders and targets for therapy The overall message to the neuroscience community from these papers may be a cautionary tale The null hypothesis that there is no causal relationship between TBI and progressive neurodegenerative disease appears to be very much in play and the book will be of interest to all those working in the field
