Casino Games On Facebook:

Ready to Play? Pieterjan Declerck, 2025-08-05 This book approaches gambling like elements such as lootboxes and social casino games from a children's rights perspective focusing on the applicable existing legal framework and providing recommendations for future regulation. Analysed legal domains include gambling regulation, consumer protection and data protection regulation as well as videogame industry self-regulation. An interdisciplinary approach serves as the foundation of the text; insights from non-legal disciplines such as psychology and media studies are integrated into the legal analysis. The book is aimed at readers with different levels of prior knowledge and experience regarding the topic by providing both step-by-step explanations of videogame-related concepts and in-depth legal discussions within the various legal domains at different levels. It examines the recent evolution where children are increasingly engaging with a changing videogame environment in which the lines between videogames and gambling are blurred. By adopting a children's rights perspective, the book aims to add a fresh perspective to the legal debate related to the interacting worlds of videogames and gambling. As the book was written based on the doctoral research of the author, one especially relevant aspect is the inclusion of recommendations and wider suggestions directed at a variety of stakeholders in the field ranging from policymakers at different levels to industry representatives, legal scholars, parents and carers. Pieterjan Declerck is a Doctor in Law and is affiliated to the Department of Law and Technology at the Faculty of Law and Criminology at Ghent University in Belgium.

Internet Gambling Sally Gainsbury, 2012-03-02 Internet gambling is one of the fastest growing forms of gambling. Global Internet gambling expenditure is predicted to reach US \$33.6 billion in 2011. This is higher than worldwide movie box office revenues and represents 9% of the international gambling market. The rapid increase in expenditure of 354% since 2003 has occurred despite Internet gambling being prohibited in several key markets including the US and China. It also suggests that current regulation may be somewhat outdated and ineffective as more and more people turn to this mode of gambling. Internet gambling is highly accessible with over 2,400 sites available 24/7 through computers, mobile phones, wireless devices and even interactive televisions. Gamblers can now play casino games, bingo, cards and poker, bet on races, sports and even celebrity weddings using over 199 means of electronic payments without leaving the house. Increasing international jurisdictions are legalizing Internet gambling and the constant accessibility of online gambling has critical social implications. Gambling operators are using aggressive advertising campaigns to move into new markets. Internet gambling appears to be particularly appealing to youth who are gambling online at substantially higher rates than adults. Furthermore, Internet gambling appears to be related to problem gambling with rates of problem gambling three to four times higher among Internet than non-Internet gamblers, indicating that it may have a substantial social cost. The anonymity of online sports betting poses a significant threat to the integrity of sport at all levels with increasing allegations of match fixing and cheating. Estimates suggested that 50% of all bets on the 2010 FIFA World Cup were placed online worth an estimated 500 million.

These figures represent a 700% rise in online betting since the 2006 tournament and included many new players that opened online accounts It is essential that appropriate responses are made by governments industry professionals and the public in response to Internet gambling This book will provide a comprehensive and up to date overview of Internet gambling including the social impact and regulatory options A global outline will include the characteristics and features of the many forms of Internet gambling including the current market and participation and differences between Internet and non Internet gambling Specific regional considerations will be explored including regulatory responses and options Importantly the social consequences and costs of Internet gambling will be examined including the impact of online gambling on sports youth and problem gambling Strategies for prevention and responsible gambling will be considered as well as expected trends
