The Coming War with China Harry I Nimon DBA,2018-03-15 War is coming again to the Pacific It is coming for the same reasons is came in 1941 Then Japan was a close friend and trading partner to the United States Japan was growing rapidly into the strongest economic power in that part of the world However they had three major domestic problems a lack of natural resources that others had a huge population growing beyond their ability to manage and the power of the United States to dictate what they did To resolve first two they had to limit the third China is now in the same position President Obama s apologetic approach to international relations allowed China to limit American power by asking for and receiving nearly any negotiation terms they desired pushing America into deep debtor status with China holding the IOU s Under President Trump the tide has dramatically turned In 1941 to limit the power of the United States in the Pacific the Japanese sent a fleet to Pearl Harbor to cripple the US Pacific Fleet They failed China learned from this major mistake or so they believe China is now implementing a plan for doing something similar with the goal of achieving the same end with the nuclear threat of North Korea aimed at Hawaii The mistaken missile alert given how the alert is triggered and the immediate demands of certain politicians there make it obvious that this was no drill Rather it is a message to America They believe they can hand President Trump and the allies a fait accompli and it is obvious for those willing to open their eyes to the facts China is telling America to obey or face another nuclear Pearl Harbor Unbelievable Only if one decides to ignore the signs that are there for all to see In the 1930 s America ignored the signs in Europe and the western Pacific and the China Seas right up to December 7th 1941 History is repeating itself in the same locations and for the same reasons resources empire and global control In the Intelligence Community there is a process known as OSINT or open source intelligence where an analyst establishes a hypothesis then begins to develop indications of whether the hypothesis is valid or not Using open sources the analyst evaluates the information the sources the statements by governments and the actions by those same governments to develop a picture or scenario This work is such a scenario of the South China Sea and it is a scary one as it points directly to the events of 70 years ago to the actions of today with perfect accuracy

Beyond Identities in Modernity Yunrui Deng,2024-11-08 This book argues that future generations of modernity as a whole will shape participatory modernization whether Chinese modernization or Western modernization The public discourse is inundated with the good and the bad modern events with the acceleration of globalization This book debates that the biggest question in the twenty first century is not who will dominate touting a new world order upon us but rather that it is the orientation of modernization that haunts our daily realities This book explores the idea that life is not about living for an identity in any society it is about the demands for dignity and safety It goes further to state that there is also a demand for the power of being and these three elements are beyond identities as modernization moves forward Interdisciplinary in nature the book uses theories data and philosophy as toolboxes to align with microrealities around the globe Witnessing modernization and modernizing identities in China and in Australia beyond day by day the author provides a more suitable more realistic and possibly more nuanced perspective This book will be of interest to professionals students academics as well as businesspeople with China experience interested in modernization and identity the Chinese perspective and the new generation of Chinese
