China S Power And Asian Security Politics In Asia:

China's Power and Asian Security Mingjiang Li, Kalyan M. Kemburi, 2014-11-27 One of the most significant factors for contemporary international relations is the growth of China's economic military and political power. Indeed, few analysts would dispute the observation that China's power has strongly influenced the structure of the international system, major power strategic relations, international security, the patterns of trans-border economic activities, and most importantly, the political and security dynamics in Asia in the twenty-first century. This book maps the growth of China's political, economic, and military capabilities and its impact on the security order in Asia over the coming decades. While updating the emerging power dimensions and prevailing discourse, it provides a nuanced analysis of whether the growth of Chinese power is resulting in Beijing becoming more assertive or even aggressive in its behavior and pursuit of national interests. It also examines how the key Asian countries perceive and react to the growth of China's power and how US rebalancing would play out in the context of Beijing's political, economic, and military power. China's Power and Asian Security will be of huge interest to students and scholars of Asian politics, Chinese politics, security studies, and international security and international relations more generally.

A Rising China and Security in East Asia Rex Li, 2008-11-21 This volume provides a comprehensive and in-depth analysis of the security discourse of Chinese policy elites on the major powers in East Asia in relation to China's self-perception as a rising power. It is the first book-length study that utilizes International Relations theories systematically to analyze Chinese security perceptions of the United States, Japan, and Russia, and the debate among Chinese international relations specialists on how China should respond to the perceived challenge from the major powers to its rise to a global status. Rex Li argues that the security discourse of Chinese policy analysts is closely linked to their conception of China's identity and their desire and endeavour to construct a great power identity for China. Drawing on extensive and up-to-date Chinese language sources, the study demonstrates that Chinese elites perceive the power aspirations and security strategies of other East Asian powers primarily in terms of their implications for China's pursuit of great power status. This new work will contribute significantly to the ongoing academic and policy debate on the nature and repercussions of China's rise. This book will be essential reading for undergraduate and postgraduate students and scholars of Asian security, China's foreign relations, security studies, and international relations.

China, the United States, and South-East Asia Sheldon W. Simon, Evelyn Goh, 2007-08-09 This volume, with its wide range of perspectives, makes a valuable contribution to the ongoing policy and academic dialogue on a rising China. Security W. Bert, 2002-12-10 China's growing economy and military power may allow it to challenge US influence in East and Southeast Asia Wayne Bert examines the likelihood of this and the impact it would have on Southeast Asian security The approach taken by both the US and China will affect the outcome of this struggle and both the Southeast Asian commitment to economic growth and the development of regional institutions will encourage peaceful evolution and a power transition that avoids major conflict **Strategic Adjustment and the Rise of China** Robert S. Ross, Øystein Tunsjø, 2017-06-20

Strategic Adjustment and the Rise of China demonstrates how structural and domestic variables influence how East Asian

states adjust their strategy in light of the rise of China including how China manages its own emerging role as a regional great power. The contributors note that the shifting regional balance of power has fueled escalating tensions in East Asia and suggest that adjustment challenges are exacerbated by the politics of policymaking. International and domestic pressures on policymaking are reflected in maritime territorial disputes and in the broader range of regional security issues created by the rise of China. Adjusting to power shifts and managing a new regional order in the face of inevitable domestic pressure including nationalism is a challenging process. Both the United States and China have had to adjust to China's expanded capabilities. China has sought an expanded influence in maritime East Asia; the United States has responded by consolidating its alliances and expanding its naval presence in East Asia. The region's smaller countries have also adjusted to the rise of China. They have sought greater cooperation with China even as they try to sustain cooperation with the United States. As China continues to rise and challenge the regional security order, the contributors consider whether the region is destined to experience increased conflict and confrontation.

Asian Security and the Rise of China

David Martin Jones, Michael Lawrence, Rowan Smith, Nicholas Khoo, 2013-01-01. Khoo, Jones and Smith have pulled off a remarkable balancing act, crafting a well-grounded and multifaceted survey of China's rise in the context of Asian security. In a field which is often marked more by scholarly effervescence than substance, the authors provide a refreshingly detailed portrait of the last two decades and fairly mindedly point out evidence which might support both extremes of the debates they challenge with their own third way. Frank Scott, Douglas, US Naval War College. US Congratulations to the authors for a clearly argued and comprehensive treatment of China's post-Cold War rise and what it means for existing and future dynamics of the Asia-Pacific region. Effectively employing realist theory in a fair-minded treatment of regional developments, the volume shows how and why power realities are more important than non-material factors in determining the region's trajectory and thereby demonstrates that China's ascendance in Asia remains complicated and conflicted. Robert Sutter, George Washington University. US. East Asia is without question a region of huge economic, political and security significance. Asian Security and the Rise of China offers a comprehensive overview and assessment of the international politics of the Asia-Pacific since the end of the Cold War, seeking to address the overarching question of how we can most convincingly explain the central dynamics of Asia's international relations. Via a realist perspective on the dynamics and frictions associated with

accommodating the rise of powerful states this timely book addresses the core issue in contemporary Asian politics the rise of China The contributors expertly evaluate China's rise and the impact it has had on the dynamics of regional relations in North East and South East Asia It demonstrates that China's economic development and its regional and international ambition increasingly conflict with the existing consensus based regional arrangements like the ASEAN Regional Forum and the East Asian Summit mechanism As a consequence smaller states in the region increasingly resort to hedging and balancing strategies in an attempt to mitigate Chinese hegemony This leaves the region in the grip of a complex and potentially destabilizing security dilemma The book offers a compelling analysis of the problem that China presents for its region that will enlighten undergraduate students of regional political studies and international relations Postgraduate and Master's students on courses addressing East and South East Asia will also find plenty of information in this invaluable book

accommodation as China grows ever stronger They look at the changing position of China from the inside How do Chinese policymakers evaluate the contemporary international order and what are the regional and global implications of that worldview The authors also address the implications of China's increasing power for Chinese policymaking and for the foreign policies of Korea Japan and the United States Contributors Robert Art Brandeis University Avery Goldstein University of Pennsylvania G John Ikenberry Princeton University Byung Kook Kim Korea University Jonathan Kirshner Cornell University Jeffrey W Legro University of Virginia Jack S Levy Rutgers University Qin Yaqing China Foreign Affairs University Robert S Ross Boston College Akio Takahara University of Tokyo Tang Shiping Nanyang Technological University Singapore Wei Ling China Foreign Affairs University Zhu Feng Peking University

China Rising David C. Kang, 2010-01-22 Over the past three decades China has rapidly emerged as a major regional power yet East Asia has been more peaceful than at any time since the Opium Wars of 1839-1841 Why has the region accommodated China's rise David C Kang believes certain preferences and beliefs are responsible for maintaining stability in East Asia His research shows that East Asian states have grown closer to China with little evidence that the region is rupturing These states see China's rise as advantageous and are willing to defer judgment as to China's wishes and future actions They believe that a strong China stabilizes East Asia while a weak China tempts other states to seek control of the region Kang's provocative work reveals the flaws in contemporary views on China and offers a new understanding of sound U S policy in East Asia
