Types of information medical professionals have access to while performing their jobs:

- How many times you have been to the doctor and why
- Which type of doctors you have seen and the procedures you have had
- The medications you are taking and your health conditions
- Test results
- Information about problems with your personal life
- Your insurance plan
- Your payment information

Health Insurance Portability and Accountability Act (HIPAA):

- A set of U.S. national standards that protect an individual's privacy rights related to their personal medical information.
- a comprehensive set of standards and practices designed to give patients specific rights regarding their personal health information (PHI).

Risk Analysis

Four of the most common HIPAA violations seen in medical facilities:

- 1) Accessing the personal health information (PHI) of friends, family, coworkers, and neighbors
- 2) Failure to perform an office risk analysis
- 3) Improper disclosure of PHI
- 4) Denying a patient access to their health information

Cybersecurity Professionals: Individuals who maintain the security of digital health records, work to prevent cyber criminals from hacking into these databases.
