Advanced Techniques for Optimal Sizing of Analog Integrated Circuits Trang Hoang,Thinh Quang Do,Thang Quoc Nguyen,Hoang Trong Nguyen,Lihong Zhang,Octavia A. Dobre,Trung Q. Duong,2025-10-27 A novel and authoritative approach to quantum machine learning in integrated circuits design optimization In Advanced Techniques for Optimal Sizing of Analog Integrated Circuits a team of distinguished researchers deliver a comprehensive discussion of the theory models methodologies practical implementation and utilization of integrated circuit IC design The authors explain IC design optimization demonstrating cost effective and time saving design approaches as well as techniques likely to be impactful in the near future The book covers major topics in the field describing key concepts recent advances effective algorithms and pressing challenges associated with analog circuit sizing optimization It discusses using both animal and human inspired optimization algorithms to create basic and quantum machine learning methods Readers will also find A novel approach to quantum machine learning in integrated circuit design optimization A range of introductory and advanced topics suitable for students advanced professionals and researchers Detailed illustrations that clarify abstract complicated engineering concepts Complete treatments of animal behavior inspired optimization algorithms including particle swarm optimization firefly algorithm cuckoo search and bat algorithm Perfect for researchers in engineering computer scientists professors and senior undergraduate and graduate students in integrated circuit design this book will also benefit students of machine learning computer science quantum computing and optimization **Advanced Methods in Techniques for Maintenance Modeling and Reliability Analysis of Repairable Systems Garima Sharma,Rajiv Nandan Rai,2023-09-27 ADVANCED TECHNIQUES FOR MAINTENANCE MODELING AND RELIABILITY ANALYSIS OF REPAIRABLE SYSTEMS This book covers advanced models and methodologies for reliability analysis of large complex and critical repairable systems that undergo imperfect maintenance actions in industries having MRO facilities and also covers real life examples from the field of aviation The content presented in this book is inspired by the existing limitations of the generalized renewal process GRP model and the problems confronted by the maintenance repair and operations MRO facilities in industries dealing with large and complex repairable systems Through this book the authors have attempted to equip the MRO facilities with more advanced scientific tools and techniques by addressing various limitations related to the reliability analysis of repairable systems The book is dedicated to various imperfect maintenance based virtual age models and methodologies to bridge various research gaps present in the available literature A summary of deliverables is as follows Presents the basic concepts of maintenance and provides a virtual age model that can accommodate all maintenance Provides the basic concepts of censoring in repairable systems along with the concept of black box and failure modes Also highlighted is how the proposed work will be useful for industries conducting failure modes and effect analysis FMEA and estimating the mean residual life MRL of repairable systems Presents methodology that applies risk based threshold on intensity function and provides a threshold to declare the system component as high failure rate components HFRCs Identifying a system as HFRCs is an important task but for an industry dealing with critical systems preventing the system from being HFRC is more important since the risk involved in such systems would be very high Thus the book presents a progressive maintenance policy PMP for repairable systems Focusses on qualitative analysis of repair quality Assuming repair quality as a subjective variable the authors have presented various factors that affect the repair quality most and modeled their interdependency using Bayesian networks BN Audience Professional reliability engineers reliability administrators consultants managers and post graduate students in engineering schools The book belongs to any engineering technical and academic institution concerned with manufacturing production aviation defense and software industries *Advanced Materials and Manufacturing Techniques for Biomedical Applications* Arbind Prasad,Ashwani Kumar,Manoj Gupta,2023-12-19 ADVANCED MATERIALS and MANUFACTURING TECHNIQUES for BIOMEDICAL APPLICATIONS The book provides essential knowledge for the synthesis of biomedical products development nanomaterial properties fabrication processes and design techniques for different applications as well as process design and optimization In origin biomaterials can come from nature or be synthesized in the laboratory with a variety of approaches that use metals polymers ceramic or composite materials They are often used or adapted for various biomedical applications Biomaterials are commonly used in scaffolds orthopedic wound healing fracture fixation surgical sutures artificial organ developments pins and screws to stabilize fractures surgical mesh breast implants artificial ligaments and tendons and drug delivery systems The sixteen chapters in Advanced Materials and Manufacturing Techniques in Biomedical Applications cover the synthesis processing design manufacturing and characterization of advanced materials self healing bioinspired nature resourced nanobiomaterials for biomedical applications and manufacturing techniques such as rapid prototyping additive manufacturing etc Audience The book is for engineers technologists and researchers working
