Schmidt, Kathleen P. King, 2010-09-01 Case studies have become a widely used instructional tool in many educational environments The use of case studies began in the 1950s at Harvard Business School Today they may be used as part of a course of study or as the main focus of a course to which other material is added While the use of case studies is prevalent in schools of business and medicine they are not often used in adult education or human resource development This may be because there are no current major publications that deal with the use of case studies in these disciplines nor are there any major databases of adult education or human resource development case studies for instructors to use Good case studies can bring reality into the classroom They can provide frameworks for discussion based on issues that must be faced in real life Complex case issues can be broken down and examined for greater understanding then pulled together again for resolution Case studies can be used successfully in adult education I propose a book based on the use of case based learning in adult education and human resource development HRD The book could be positioned as a supplement to course textbooks for courses in adult education and HRD I would write the cases and develop the exercises but could also get others to contribute a case study or exercise to the book Cases would each be a half page to maybe 2 3 pages at the long end and would include questions for students readers Supplementary information possibly in the form of a DVD could be put together for instructors This information would include case study focal points and examples of possible

responses for each study exercise **Human Resource Development** H. Kaushal, 2021 This book is an attempt at making good this vital deficiency Three chapters in Part I deal with theoretical background of the case studies and general technique for solving a case study Two simple cases of general nature are included in this part to illustrate the technique for solving case studies discussed in the theory chapters The rest of the book contains case studies divided into four parts Parts II and III are for self study Part II contains case studies followed by complete suggested solutions and a case study for exercise 12 such pairs of case studies are available in this part Part III has case studies hints about the solutions and a case study for exercise
