Chimera User Manual:

PEGSUS 4.0 User's Manual N. E. Suhs, R. W. Tramel, 1991 Many aerodynamic configurations are too complex to be represented by a single computational mesh. A multiple mesh domain decomposition method called chimera has been developed to allow complex aerodynamic configurations to be modeled by a system of individually generated meshes each representing a component of the overall configuration. The chimera approach requires the use of two computer codes: PEGSUS and a flow solver. PEGSUS calculates the interactions among the meshes and produces a file consisting of interpolation information that is used by the flow solver to obtain a global flow field solution for the entire mesh system. This report documents the design and use of the latest version 4.0 of PEGSUS and describes techniques for proper modeling of complex aerodynamic configurations.

Handbook of Grid Generation Joe F. Thompson, Bharat K. Soni, Nigel P. Weatherill, 1998-12-29 Handbook of Grid Generation addresses the use of grids/meshes in the numerical solutions of partial differential equations by finite elements, finite volume, finite differences, and boundary elements. Four parts divide the chapters: structured grids, unstructured grids, surface definition, and adaption/quality. An introduction to each section provides a roadmap through the material. This handbook covers fundamental concepts and approaches: grid generation process, essential mathematical elements from tensor analysis and differential geometry particularly relevant to curves and surfaces, cells of any shape, Cartesian structured, curvilinear coordinates, unstructured tetrahedra, unstructured hexahedra, or various combinations. Separate grids overlaid on one another, communicating data through interpolation, moving boundaries, and internal interfaces in the field, resolving gradients and controlling solution error. Grid generation codes, both commercial and freeware, as well as representative and illustrative grid configurations. Handbook of Grid Generation contains 37 chapters as well as contributions from more than 100 experts from around the world, comprehensively evaluating this expanding field and providing a fundamental orientation for practitioners.

Sequencing Technologies in Microbial Food Safety and Quality Devarajan Thangardurai, Leo M.L. Nollet, Saher Islam, Jeyabalan Sangeetha, 2021-04-14 Molecular landscape for food safety analysis is rapidly revolutionizing because of high resolution and value added resulting analysis of next generation sequencing (NGS) approaches. These modern sequencing technologies drive worldwide advancements in food safety and quality. Sequencing Technologies in Microbial Food Safety and Quality reviews several practices in that NGS contributes to foodborne pathogens, functional characterization, management, and control. This book focuses on potential uses of sequencing technologies in microbial food safety and quality and highlights present challenges in the food industry. Key Features: Application of whole genome sequencing technologies in disease diagnostics, surveillance, transmission, and outbreak investigation in food sector; Impact of sequencing tools in the area of food microbiology; Recent advances in genomic DNA sequencing of microbial species from single cells; Microbial bioinformatics resources for food microbiology; High throughput insertion tracking by deep sequencing for the analysis of food pathogens. This book includes contributions from experts who

have manipulated sequencing tools in relation to microbial food safety and quality Presenting comprehensive details about NGS approaches in food science this book is an updated and reliable reference for food scientists nutritionists food product investigators to study and implement the sequencing technologies for developing quality and safe food This book would also serve as informative resource for food industry officials government researchers food science or food nutrition students who seek comprehensive knowledge about the role of emerging sequencing technologies in revolutionizing the food industry
