**and Socio-Economic Development in China** Parikshit Basu,Yapa Bandara,2009-06-15 This book reviews how China's accession to the WTO has impacted upon its education environment economic and social outcomes in recent years It has been argued that China's rapid growth in output and exports and subsequent accession to WTO has significantly increased income and therefore the well being of the Chinese population However doubts are now being raised that higher income is generated at the cost of deteriorating environmental and social standards which has increasingly affected the health of the Chinese people especially those who live in major industrial cities Also there is a widespread perception that its accession to WTO has significantly increased social shocks especially among the farming community and contributed to poor health outcomes among the rural population These issues are critically analysed in this book by experienced academics from China and Australia Includes contributions from Australian and Chinese scholars and thus brings together ideas and suggestions from a broad range of perspectives Analyses China's socio economic challenges from a multi dimensional focus A very useful reference in WTO issues in general and China in particular      **China's Foreign Affairs** ,2005      China's Foreign Affairs Ministry of foreign affairs.
