Microbiological Examination Methods of Food and Water Neusely da Silva, Marta Hiroto Taniwaki, Valéria Christina Junqueira, Neliane Silveira, Maristela da Silva do Nascimento, Renato Abeilar Romeiro Gomes, 2012-12-18

Microbiological Examination Methods of Food and Water is an illustrated laboratory manual that provides an overview of current standard microbiological culture methods for the examination of food and water adhered to by renowned international organizations such as ISO, AOAC, APHA, FDA, and FSIS, USDA. It includes methods for the enumeration of indicator microorganisms, of general contamination indicators of hygiene and sanitary conditions, spore-forming spoilage fungi, and pathogenic bacteria. Every chapter begins with a comprehensive in-depth and updated bibliographic reference on the microorganisms dealt with in that particular section of the book. The latest facts on the taxonomic position of each group, genus, or species are given, as well as clear guidelines on how to deal with changes in nomenclature on the internet. All chapters provide schematic comparisons between the methods presented, highlighting the main differences and similarities. This allows the user to choose the method that best meets his/her needs. Moreover, each chapter lists validated alternative quick methods which though not described in the book may and can be used for the analysis of the microorganisms dealt with in that particular chapter. The didactic setup and the visualization of procedures in step-by-step schemes allow the user to quickly perceive and execute the procedure intended. This compendium will serve as an up-to-date practical companion for laboratory professionals, technicians, and research scientists, instructors, teachers, and food and water analysts. Alimentary engineering, chemistry, biotechnology, and biology undergraduate students specializing in food sciences will also find the book beneficial. It is furthermore suited for use as a practical laboratory manual for graduate courses in Food Engineering and Food Microbiology.
