

Lesson Plan: biology

Aim

Students will learn about the scientific method, the different types of cells, and the role of enzymes in biological processes.

Objectives

1. Students will be able to identify and describe the scientific method.
2. Students will be able to distinguish between the different types of cells.
3. Students will be able to explain the role of enzymes in biological processes.
4. Students will be able to analyze data and draw conclusions based on their observations.

Possible Materials Needed

1. Textbook or educational handouts on biology
2. Microscope
3. Slides and prepared microscope specimens
4. Enzymes activity kit
5. Scientific Method worksheet
6. Objectives assessment sheet
7. Short video on enzymes

Anticipatory Set

1. Begin the lesson by engaging the class in a discussion about the scientific method. Ask the class to consider how scientists use the scientific method to make observations, form hypotheses, and draw conclusions. Discuss how the scientific method is used to help scientists answer questions about the natural world.
2. Introduce the different types of cells and ask the class to consider the similarities and differences between them. Provide the class with a diagram of the different types of cells and ask them to identify the components of each cell. Ask the class to consider how the size and structure of a cell is related to its function in the body.
3. Introduce the concept of enzymes and explain how they are essential to biological processes. Give examples of some of the roles that enzymes play in the body and explain how their structure and function are related. Ask the class to consider how mutations or environmental factors might affect the structure and function of enzymes.
4. Lastly, ask the class to consider how they can apply the scientific method to their own research projects. Explain the importance of data gathering and analysis and how it can help them draw conclusions from their observations.

Advanced Pre-Med Studies Parent Lesson Plan ,2013-08-01 Advanced Pre Med Studies Course Description Semester 1 From surgery to vaccines man has made great strides in the field of medicine Quality of life has improved dramatically in the last few decades alone and the future is bright But students must not forget that God provided humans with minds and resources to bring about these advances A biblical perspective of healing and the use of medicine provides the best foundation for treating diseases and injury In Exploring the History of Medicine author John Hudson Tiner reveals the spectacular discoveries that started with men and women who used their abilities to better mankind and give glory to God The fascinating history of medicine comes alive in this book providing students with a healthy dose of facts mini biographies and vintage illustrations It seems that a new and more terrible disease is touted on the news almost daily The spread of these scary diseases from bird flu to SARS to AIDS is a cause for concern and leads to questions such as Where did all these germs come from and how do they fit into a biblical world view What kind of function did these microbes have before the Fall Does antibiotic resistance in bacteria prove evolution How can something so small have such a

huge deadly impact on the world around us Professor Alan Gillen sheds light on these and many other questions in *The Genesis of Germs* He shows how these constantly mutating diseases are proof for devolution rather than evolution and how all of these germs fit into a biblical world view Dr Gillen shows how germs are symptomatic of the literal Fall and Curse of creation as a result of man's sin and the hope we have in the coming of Jesus Christ

Semester 2 Body by Design defines the basic anatomy and physiology in each of 11 body systems from a creationist viewpoint Every chapter explores the wonder beauty and creation of the human body giving evidence for creation while exposing faulty evolutionist reasoning Special explorations into each body system look closely at disease aspects current events and discoveries while profiling the classic and contemporary scientists and physicians who have made remarkable breakthroughs in studies of the different areas of the human body

Within Building Blocks in Life Science you will discover exceptional insights and clarity to patterns of order in living things including the promise of healing and new birth in Christ Study numerous ways to refute the evolutionary worldview that life simply evolved by chance over millions of years The evolutionary worldview can be found filtered through every topic at every age level in our society It has become the overwhelmingly accepted paradigm for the origins of life as taught in all secular institutions This dynamic education resource helps young people not only learn science from a biblical perspective but also helps them know how to defend their faith in the process
