**Representations of Nature of Science in School Science Textbooks** Christine McDonald, Fouad Abd-El-Khalick, 2017-04-21

Bringing together international research on nature of science (NOS) representations in science textbooks, the unique analyses presented in this volume provide a global perspective on NOS from elementary to college level and discuss the practical implications in various regions across the globe. Contributing authors highlight the similarities and differences in NOS representations and provide recommendations for future science textbooks.

This comprehensive analysis is a definitive reference work for the field of science education. **SDEA Journal** South Dakota Education Association, 1929 **Advances in Language and Education** Anne McCabe, Mick O'Donnell, Rachel

Whittaker, 2007-07-19 This book examines new functional approaches to language and education and the impact of these on literacy in the classroom. The first section looks at issues of multimodality in which the definition of a text is expanded to include not only that which is written down but also the interaction of writing, graphics, and audiovisual material. The contributors explore ways in which language education can be expanded to deal with multimodal discourse, whether in children's books, in textbooks, or on the web. The second section looks at how critical discourse analysis and appraisal theory can be used as tools for assessing the effectiveness of student writing and literacy achievement and also for helping

developing writers to write more successfully The final section argues that corpus based studies of language have changed the way we see language and that the way we teach language should evolve in line with these changes This appealing survey of new directions in language and education includes contributions from internationally renowned scholars It will be of interest to researchers in systemic functional linguistics or language and education *Contributions to Education* ,1929
