The *Engine Management Light* (highlighted opposite) will remain illuminated when the ignition key is turned to the "ON" position and whilst the engine is not running. This is normal and deliberate to demonstrate to the rider that the light is working.

The *Engine Management Light* should "GO OUT" shortly after the engine is started. If the light remains illuminated whilst the engine is running at idle speed, the below ECU reset procedure should be performed.

Should the *Engine Management Light* remain illuminated whilst the engine is running after performing the below ECU reset procedure, further investigation and diagnosis will be necessary.
