The New Political Economy of Emerging Europe

László Csaba, 2007. In this second revised and extended edition, the evolution of emerging Europe is analyzed against the background of major changes in the constitutional, fiscal, regional, and neighborhood policies of the European Union. The book provides an overview of the economic challenges in the post-transition period when the Communist past is no longer a defining feature of development. Interpreting successes and failures in a single analytical frame, the book is devoted to the new agenda faced by middle-income countries in the double challenge of globalization and Europeanization. It analyzes if, when, and to what degree joining the European Union provides a solution and how new members can contribute to the Lisbon Strategy of the EU. The book finds that solid finances, reliance on foreign direct investment, public policies committed to the public purpose rather than to vested interest, and impartial regulation and enforcement of rule of law are among the major components of success. It also

Reorganization from four parts to three provides a more streamlined sequencing for economic development courses. All new country case studies target pertinent issues such as Divergent Development, Pakistan, and Bangladesh, and Understanding a Development Miracle, China. Thoroughly updated and revised comparison case studies provide the most current illustrations of policy and its outcomes.
