(Introductory Macroeconomics) (Chapter – 3) (Money and Banking)

(Class – XII)

➤ Standard of deferred payments

Payments can easily be made through the medium of money. In other words, it is very difficult to pay back a loan in terms of goods and services. However, with the advent of money the payments of loans or interests can easily be made.

➤ Money overcomes the shortcomings of barter system in the following manner:

- Money solves the problem of double coincidence of wants. For example, if a person needs wheat in exchange of tea, then he/she must search for a person who is ready to trade wheat for tea. Money made the need for such searches redundant.
- In barter system, it was very difficult to measure the value of one good in terms of another. For example, it is difficult to calculate the value of a cow in terms of wheat.
- It was very difficult to store goods, especially perishable goods (fruits, meat, etc.) for the purpose of value storage. Money serves this purpose.
- The contractual or future payments are much difficult to be made in barter system. For example, a worker working on contract basis could not be paid in terms of rice or chairs.

Question 3:

What is transaction demand for money? How is it related to the value of transactions over a specified period of time?

Answer 3:

Transaction demand for money refers to the demand for money for meeting day to day transactional needs. As money is a liquid asset (easily acceptable or exchangeable), everyone has the tendency to hold money. People earn incomes at distinct points of time but consume throughout the entire period. So, people tend to hold money for transaction purposes.

The relationship between the value of transactions and transaction demand for money can be explained as:

The transaction demand for money in an economy (M_T^d) can be written as $M_T^d = KT$

$$\Rightarrow \frac{1}{K} M_T^d = T \quad \Rightarrow v M_T^d = T$$

Where, $v = \frac{1}{K}$ Represents velocity of circulation of money

T = Total value of transactions in the economy over a period of time and K is a positive fraction.

M_T^d = Stock of money people are willing to hold at a particular point of time.

The transaction demand for money is positively related to the total value of transactions and negatively related to the velocity with which money is circulated.

Question 4:

What are the alternative definitions of money supply in India?

Answer 4:

The various definitions of money supply in India as prescribed by RBI are M_1 , M_2 , M_3 and M_4 . M_1 , M_2 , M_3 and M_4 are arranged in the descending order of liquidity. In other words, M has the highest liquidity and M has the least liquidity.

So, $M = C + DD + OD$

Where, C = Currency held by public

DD = Net demand deposits of the bank

OD = Other deposits held by RBI

$M_2 = M_1 + \text{Savings of the people with Post offices (M includes the components of M as well as the savings of people with Post office.)}$

official corruption through the introduction of the offense of illicit enrichment in almost every multilateral anti corruption convention Illicit enrichment is defined in these conventions to include a reverse burden clause which triggers an automatic presumption that any public official found in possession of inexplicable wealth must have acquired it illicitly However the reversal of the burden of proof clauses raises an important human rights issue because they conflict with the accused individual s right to be presumed innocent Unfortunately the recent spate of international legislation against official corruption provides no clear guidelines on how to proceed in balancing the right of the accused to be presumed innocent against the competing right of society to trace and recapture illicitly acquired national wealth Combating Economic Crimes therefore sets out to address what has been left unanswered by these multilateral conventions to wit the level of burden of proof that should be placed on a public official who is accused of illicitly enriching himself from the resources of the State balanced against the protection of legitimate community interests and expectations for a corruption free society The book explores the doctrinal foundations of the right to a presumption of innocence and reviews the basic due process protections afforded to all accused persons in criminal trials by treaty customary international law and municipal law The book then goes on to propose a framework for balancing and situationalizing competing human rights and public interests in situations involving possible official corruption
